Pandit Indra Deva Tewari,

1. Under Regulation 39 of Chapter I of the Regulations of the Benares Hindu University, the Chairman moved :—

“That the Honorary Degree of Doctor of Laws be conferred on His Highness Maharaja Sir Sri Krishnaraja Wadiyar Bahadur, G. C. S. I., of Mysore, the first Chancellor of the Benares Hindu University at the next Annual Convocation.”

In doing so he said :—

“Gentlemen, you will be pleased to hear that the Syndicate has unanimously recommended that the Honorary Degree of Doctor of Laws be conferred upon His Highness the Maharaja Sahib of Mysore at the Annual Convocation which is to be held on the 19th of January next. The

proposition is now before you and I do not think that many words are required to commend it to you for acceptance. We all know what invaluable service His Highness rendered to this University by accepting the first Chancellorship. He has also helped to build up the University by his generous contribution. In addition to this, His Highness has done a great deal to promote the cause of education in his state. All kinds of education—scientific, technical and general have received the anxious care and patronage of His Highness. He has recently established a University in his State. It seems to me that we cannot express our appreciation of the valuable services which His Highness has rendered to this University for six long years and of his love for education and of his patronage of education in his own State, in a better way than by conferring upon him the highest honour which it is in the power of the University to confer. I therefore, propose that the Senate be pleased to confer the Honorary Degree of Doctor of Laws upon our first Chancellor, His Highness the Maharaja Sahib of Mysore. I hope you will unanimously accept my proposal."

The proposition was carried unanimously.

2. Under Regulation 39 of Chapter I of the Regulations of the Benares Hindu University, the Chairman moved :—

"That the Honorary Degree of Doctor of Laws be conferred upon His Highness Maharaja Sir Madhavarao Scindia Bahadur, G. C. S. I, G. C. V. O, LL. D., of Gwalior, the first Pro-Chancellor of the Benares Hindu University at the next Annual Convocation."

In doing so he said :—

"Gentlemen, as you are all aware, His Highness the Maharaja Sahib of Gwalior has greatly helped the University by accepting the responsibility of being its Pro-Chancellor

continuously for the first six years. We also know his princely contribution towards the building up of our University. Besides, His Highness has done a good deal to promote education in his own State. In addition to a well organised system of general education including an Arts and Science College which is maintained by the State, facilities have been provided for imparting industrial and technical education. We wish to express our grateful appreciation of the invaluable support given by His Highness to our University and of his general love of education and a University cannot do this in a better way than by conferring upon His Highness the highest honour that it lies in its power to confer. I therefore commend the recommendation of the Syndicate to your favourable consideration. I hope you will accept it unanimously."

The proposition was carried unanimously.

3. Under Regulation 39 of Chapter I of the Regulations of the Benares Hindu University, the Chairman moved :—

"That the Honorary Degree of Doctor of Laws be conferred upon His Highness Maharaja Sir Prabhu Narayan Singh Bahadur, G. C. S. I., of Benares at the next Annual Convocation."

In doing so he said :—

"Gentlemen, I propose that the Honorary Degree of Doctor of Laws be conferred upon His Highness the Maharaja Sahib of Benares. The Hindu University owes a great deal to His Highness. It was His Highness who made the first gift of the site upon which the Central Hindu College stands. Again it was His Highness who helped and encouraged us from the first in our endeavour to establish this University and made a generous contribution to its funds. Practically, all the most distinguished guests of the University are the guests of His Highness. His Highness has never refused any

help which we have asked of him. Among all our esteemed patrons, His Highness occupies quite a singular position. We owe more to His Highness than we can tell and we desire to express our humble appreciation of the generous and princely support which he has always given us, in the best way in which it is open to us to do so, that is by conferring upon His Highness the Honorary Degree of Doctor of Laws. As is well-known, His Highness is a Scholar of Samskrit and takes a deep interest in the promotion of Samskrit Literature. By reason of his eminent position and attainments, His Highness is a perfectly fit and proper person upon whom the Syndicate and Senate should confer the Honorary Degree of Doctor of Laws. I hope that you will unanimously accept my proposal."

The motion was carried unanimously.

4. Under regulation 39 of Chapter I of the regulations of the Benares Hindu University, the Chairman moved :—

"That the Honorary Degree of Doctor of Laws be conferred upon his Highness Maharaja Sir Sayaji Rao Gaekwad Bahadur, G. C. S. I. of Baroda, the present Chancellor of the Benares Hindu University at the next Annual Convocation"

In doing so he said :—

"Gentlemen, the Syndicate has further nnanimately recommended that the Honorary Degree of Doctor of Laws should be conferred upon His Highness the Maharaja Sabib of Baroda, our present Chancellor His Highness was the first among the Ruling Princes who took up the cause of education in a very earnest manner. He came to the *Guddi* in 1881. In 1885 he passed an order that 30 new schools should be opened every year. In 1891-92 he made education compulsory in some parts of his territory, and later on in 1906-07 he introduced a compulsory system of education

throughout his State. There is now not one village in his territory which has not got a school of its own. His Highness has been a most honoured pioneer in the cause of education, and has promoted both general, technical and professional education in his State. His Highness has also been a staunch friend of women's education. He has opened schools and Training Colleges for women students and has introduced a system of Zenana classes through which the benefits of education are brought home to married women who do not wish to or cannot attend public institutions. He has taken a keen interest in the education of depressed classes also. Quite a large number of schools have been opened for students of these classes. The Kala Bhavan started and maintained by His Highness for imparting, technical and industrial education has attracted and benefitted students from all parts of India. His Highness has extended very valuable patronage to Sanskrit Education and has at the same time been a great patron of Vernacular Education. Many scholars have been working in this direction in his territory and outside it, and every year new literature has been coming into existence. His Highness has also taken a keen interest in providing for the moral and religious instruction of his people. It is not necessary for me to dwell further upon the progress achieved by His Highness during his reign. His Highness stands pre eminent among his brother princes and indeed throughout India as a great friend of education and a great patron of learning. Like his predecessor in office, His Highness has honoured the Hindu University by accepting its Chancellorship. He has thus added to the obligation which the University already owed him for his donation to the institution. We cannot express our grateful appreciation of His Highness' glorious achievements in the field of education both as a ruler and a patriot better than by conferring upon him the highest honour which it is in the power of this University to confer.

His Highness is in every way a most eminent and fit person upon whom the Honorary Degree of Doctor of Laws should be conferred, and I hope that you will unanimously confer it upon him.

The motion was carried unanimously.

5. Read the report of the meeting of the Academic Robes Committee held on the 13th December, 1923.

(a) Professor P. Seshadri moved :—

That the following recommendation of the Robes Committee be accepted :—

Resolved that it be recommended to the Senate that the following Academic Robes be prescribed for the B. Sc. Degree in Engineering :—

‘A mid-purple (No. 281) stuff gown, like the Oxford University Bachelor of Arts Gown and a hood made of silk of the same colour, edged with a band of shining cream-colour of one inch width on both sides, lined throughout with silk of the same colour.’

Professor P. K. Dutt seconded the motion.

The proposition was then put to the vote and carried.

(b) *Resolved* that a sub-committee consisting of :—

- (1) The Vice-Chancellor,
- (2) The Pro-Vice-Chancellor,
- (3) The Principal, College of Oriental Learning,
- (4) The Principal, College of Theology, and
- (5) The Registrar

with the Registrar, as *Convener*, be appointed and authorised to prescribe the robe for the Śāstrāchārya Degree of 1924 and to take the necessary action in the matter.

6. The item to elect two members of the Court under Statute 14 (I) Class III clause (c) in places of the Hon'ble Mahamahopadhyaya Dr. Ganga Nath Jha and Dr. Ganesh

Prasad whose terms had expired on the 5th January, 1924, was taken up for consideration

The Pro-Vice-Chancellor proposed:—

‘That Professor R. S. Inamdar and Kaviraj Umacharana Bhattacharya be elected to the Court under Statute 14 (1) Class III clause (c).

Professor M. B. Rane seconded the motion.

The resolution was put to the vote and carried.

The meeting was then dissolved.

The Vice-Chancellor said -

"Gentlemen, I can well imagine how deep your disappointment is at not having the pleasure of offering a hearty welcome to the Chancellor, His Highness the Maharaja Gaekwad of Baroda. We expected His Highness to be here to-day. His Highness has taken the trouble of coming all the distance from Baroda to honour and encourage us by his presence and by speaking at this function. But unfortunately he has been laid up with illness and doctors have not permitted him to attend the function to-day. Deep as your disappointment is, I assure you that the disappointment which His Highness has felt is more than that of yours for not having been able to be present amongst you. However, you will be glad to hear His Highness has been pleased to stay at Kashi for sometime and when he is better, as we all hope he will soon be, he will preside over a Special Convocation, which will be convened on the 26th instant and then you will have the pleasure of offering His Highness your cordial welcome. I hope that you will be satisfied for the present by this information and that you will all—both ladies and gentlemen, send up your hearty prayers for His Highness the Chancellor's health so that he may soon recover and live for many long years for the glory of the motherland (cheers).

In the absence of His Highness the Chancellor, Sir Mannubhai Mehta, Dewan of the Baroda State, read the Convocation address of the Chancellor

The Vice-Chancellor addressed the Court in Hindi. He said that when they adjourned the meeting of the Court to that day, they all hoped that their Chancellor, His Highness the Maharaja Gaekwar of Baroda would preside over their deliberations, but though His Highness had arrived at Benares unfortunately sudden illness prevented him from honouring the Convocation by his presence. They would be glad to know however that His Highness was a little better than before, and he hoped that His Highness would be able to preside at the Special Convocation to be held on the 28th January, 1924.

Telegrams and letters had been received from several patrons, supporters and donors of the University regretting their inability to attend the meeting. The Pro Chancellor, His Highness the Maharaja Sahib of Bikanir had also wired expressing his inability to attend the Convocation owing to the work of the Chiefs Conference at Delhi. But the Vice Chancellor felt assured that His Highness would honour them by a visit later on.

During the year, death had taken away four supporters of the University. They mourned the loss of Rai Purnendu Narayan Sinha Bahadur of Patna, Raja Parmanand, Rai Bahadur of Moradabad, Babu Bholanath Barooab of Assam and Babu Jaykrishna Rohtagi of Patna and Calcutta. On behalf of the members of the Court he desired to express their sorrow at the loss of those benefactors of the University and to offer their sympathy to the members of the bereaved families.

He (the Vice Chancellor) had on the preceding day given a pretty long account of the University. It was not therefore necessary for him to repeat it there. However, he would remind them briefly of the progress which had been made during the past year, and of their requirements for the coming year, and also of their financial position.

ACCOUNTS & DONATIONS.

At the last meeting of the Court held on the 16th December, 1924, in conformity with Statute 15 (2), he had placed before it the proceedings of the Council and of the University and a statement of receipts and expenditure and the audited balance sheet. Copies of these had been sent to the members of the Court and he hoped that the members had got them by that time. The balance sheet would show them how they stood in the matter of receipts and expenditure. At the preceding meeting of the Court, he gave a detailed account of the money received and spent on the various departments up to that time. He would confine himself to the account of the year that had elapsed.

Members would remember that the Council had appointed a Retrenchment Committee to consider the possibility of reducing the expenditure and raising the income of the University. The Court added certain members to it. That Joint Committee, held many meetings and considered the whole question thoroughly. They then submitted certain recommendations to the Council which were accepted. The recommendations were made in two instalments. In their preliminary Report they made recommendations regarding the recurring expenditure. They reduced it by Rs. 1,56,273 but even after doing so, they found that there would still be a deficit of Rs. 67,696. That was due to the interest which had to be paid on their large withdrawals from the Bank. This deficit they recommended must be recouped from fresh collections which the University would make during the year. While reducing the expenditure, the Committee did not make any reduction in the personnel of the Staff. With the exception of one member who was asked to retire owing to old age, the staff was left practically untouched. In their final Report the Committee recommended that an appeal should be made (1) to the

Government of India to increase its annual grants, (2) to the Provincial Governments and the Indian Darbars for annual recurring grants and scholarships for their own students, and (3) to the general public for annual donations of Rs 100 and upwards. They further recommended that special efforts should be made to raise subscriptions from the general public by a collection tour such as was undertaken in the early stages of the University and that a sufficient number of men should be appointed to raise funds.

As he had explained to the Court last year, the University owed to the Bank Rs. 16,14 033/14/4 and to other creditors for outstanding bills Rs 3,00,000/—They had in hand $3\frac{1}{2}$ p c G P Notes of the face value of about Rs 12,15 400/ which they could sell. That investment brought them interest to the extent of Rs 43,000 per year. But they decided to sell the notes and to apply the money to reduce their debt. They did so after taking expert advice. They sold notes of the face value of Rs 8,34,600 at a rate of about 64 per cent and realised Rs 5,43 169/11/4. They had to bear a loss on the transaction, but it could not be helped. The debt of the Bank amounting to Rs 16,65, 661/7/8 was reduced on the 1st September, 1923 to Rs 13,60,051/13/8. They applied Rs 2,32 786/6/6 towards the payment of the bills outstanding up to the 30th June, 1923. But as their regular income was not yet enough to meet the annual expenditure they had to rely a good deal on donations and they could not say positively how things would stand after a few months. Their work would go on satisfactorily only if they received handsome donations. In some years the University received so much as 8 or 10 lakhs but sometimes they received very much less. During the last year up to the 15th January, 1924, they could collect only Rs 67,876/12/0. He regretted he himself could not go about sufficiently to collect money nor could other members

do much in the direction. They had already a deficit of Rs. 65,265/- in their current year's budget which they had to meet. Besides they wanted money to carry on the work of the various departments. They had therefore to take the help of the Bank and the result was that the debt which had been reduced to about 13 lakhs had again risen to about 15 lakhs. They therefore required about 20 lakhs most urgently in order to pay off the debt and to go on smoothly for the next year. The donations which had been promised but had not till then been paid amounted to 30 lakhs. Bearing in mind that nearly three-fourths of the total sum that had been promised had been paid, he expected that the greater part of the balance would be paid. But it was very necessary that adequate efforts should be made to collect the amount.

The University had made very satisfactory progress in all other directions. It had attracted students in large numbers. They had nearly 2,000 students on the rolls. The result was that the hostels and the laboratories which they constructed were insufficient for their work. They felt the need for more buildings and for the further equipment of the various departments which they had created. The University was growing every day like a healthy child, and the more it grew the more its appetite increased, and naturally it required proportionately much more food to maintain itself. Such being the case, if they wanted that its growth and progress should not be stunted and stopped they must find more money for it. It was sometimes urged that they should not increase their responsibilities by opening new departments when they could not sufficiently meet the needs of those they had already started. But not unoften donations which were offered to them were earmarked for a definite purpose, and when they accepted them they naturally had to give effect to the desires of the donors. More than one department had been created in that manner. But experience had taught

them that much more was afterwards required to equip a department and to bring it up to the standard of the University. They would therefore not start a new venture nor begin the construction of a new building unless sufficient funds had been actually collected for it.

When the project for establishing the Hindu University was first placed before the public, it was thought that one crore would be needed for the purpose. An endeavour was made to raise the amount, and it was a matter for supreme thankfulness that by the grace of God, they had actually realised Rs. 99,46,497/6/11 in cash out of the total promised donation of Rs. 1,29,43,402/6/11. But experience had shown that altogether 5 crores were needed to make the University a first-rate institution of its kind in the world. The collection of such a large sum might appear to be impossible, but it was really not so. If they all put their hearts together and determined in right earnest to make a sufficiently long, persistent, strenuous effort, he had no doubt they would be able to collect four crores more. The rearing of an institution was not an easy affair. It required both time and courageous, hopeful continuous effort. If they wanted to make the University one of the best Universities of the world, they must work hard to collect funds for it. Pessimism or faint-heartedness would not help them. They should remember the words Lakshmana addressed to Rama :—

उत्साहो बलवान् आर्य, उत्साहवन्तो हि नरा न लोके सीदन्ति कथिष्वतिदुष्क्रेषु

‘Enthusiasm is powerful, brother, men of enthusiasm do not allow themselves to be dejected even when they are engaged in the most difficult of tasks.’ That was a lesson which they must take to their hearts. In ancient times in India students used to maintain not only themselves but also their Gurus. The same spirit should inspire the students and scholars of their University. If they organised the collection

of funds during the vacation, he had no doubt they would be able to collect enough to be able to wipe off the debt of the University.

The several departments which they had started were going forward with their respective work. The equipment of the department of Mining and Metallurgy for teaching up to the B. Sc. degree had almost been completed. Courses for degrees in Mining Engineering and Metallurgy had been instituted and students were being prepared for them. The Department of Chemistry had also made rapid progress. The number of research students had gone up. They were endeavouring to equip the industrial section of the Department. The need for it was pressing. The College of Mechanical and Electrical Engineering which had cost them a great deal was yet the best equipped institution of its kind in India. The Departments of Botany, Zoology and Geology were also well-equipped, but money was needed to provide separate buildings for them. The colleges of Oriental Learning and Theology were located in a separate building and were steadily progressing. They were working to create at the University the best centre of Samskrit learning not only in India but in the whole world. They were the inheritors of the ancient culture and civilisation of India and the custodians of all that was good and beautiful in that language of gods, the Samskrit. It was their duty not only to preserve that noble legacy but also to scatter broadcast the treasures it contained for the good of mankind. It was a matter for admiration that the study of Samskrit was pursued in Germany with great success. But they owed it to the Rishis and to themselves to see that the race of scholars who have made Kashi famous and of scholars like Professor Dhruva and Mahamahopadhyaya Pandit Pramathanatha Tarkabhusana was kept up and that they multiplied.

As they all knew there was another Samskrit College at Benares which had existed for a long time and had done very valuable work. But since they had established the Samskrit Department in their own University, both the institutions were doing the same work in the same city. About 55 thousand rupees a year was being spent by each institution for the same purpose, and this duplication was obviously wasteful. The colleges of Theology and Oriental Learning constituted the very heart of the University. They could not abolish them. The only possible solution was that the old Samskrit College of Benares should be amalgamated with their Samskrit department. An endeavour had been made to bring about such a solution, but no favourable decision had been arrived at till that time. He still hoped however, that the amalgamation would be brought about and that it would be the means of making Benares renowned as a modern centre of Samskrit learning.

Up to that time their Department of Ayurveda existed as a branch of the College of Oriental Learning, but they had decided to make it an independent College. There was great need for that College. Some money had already been subscribed for the purpose. Seth Mathuradas Vassanji Khimji of Bombay had generously promised Rs. 1,50,000 out of which he had already paid Rs. 1,00,000. Seth Daya Shanker Dev Shanker Dave of Kathiawar and Bombay had also paid Rs. 1,00,000. Seth Baldevdas Hazarimal of Calcutta had paid Rs. 1,00,000 and Seth Khetsey Khersey of Bombay one lakh for the construction of a hospital. One lakh had been promised by Pandit Baldevram Dave and the Hon'ble Mr. Justice Kanhaiya Lal and their nephew to meet the maintenance charges of the hospital. They would then see that out of those donations a sum of two lakhs was earmarked for the construction and maintenance of the hospital. Arrangements were in progress for its construction and he hoped that

when they would meet again, the hospital would be ready. They had also felt the pressing need of an Aushadhalaya for the college of Ayurveda, and had therefore constructed a separate building for it. Not only would the preparation of medicines be taught to students of Ayurveda, but in course of time genuine medical preparations would be supplied at moderate prices to the public.

He had informed the Court in the preceding year of the scheme of the "Makanji Khatau Hostel for Women." The construction of the hostel would soon be taken in hand and he hoped it would be ready within a year. It would accommodate 100 women students, who would both live and receive instruction there. A separate staff of ladies would be engaged for teaching the young women and looking after them. The management would be entirely in the hands of ladies.

Arrangements for imparting Military training to their youngmen had been completed and an Officers' Training Corps had been established at the University.

A Town Committee had been constituted by the Council to look after Sanitation, Public Health, Roads, Arboriculture Conservancy, Water-Works, Lighting, Watch and Ward, Markets, Primary Education, etc., of the University Town. The Chairman of the Committee was the Pro-Vice-Chancellor and the Vice-Chairman Mr. D. N. Ohdedar, who had done excellent work as Senior Vice-Chairman of the Allahabad Municipal Board for several years, and whom he cordially welcomed as an honorary worker to the University. The Committee would have representatives of the Professors, students and residents living in the University area. He hoped that the Committee would soon begin its work.

The arrangement for electric lighting had been completed. They had been working with an old engine which could not provide sufficient energy to light up the whole University.

site. But they had recently installed in their Power House a new engine which had cost them Rs. 20, 000 and he hoped that they would soon be able to supply electric light to the second and the third hostels and the residences.

As regards the question of religious instruction, students were instructed to perform morning and evening prayers quietly by themselves. Lectures on religion were regularly given to classes by the two religious Instructors. Select Kathas were also recited on every Ekadashi day which all the members of the staff and the students were required to attend. Arrangements for the instruction of Jain students in their religion had been made. A Jain teacher had been appointed for the purpose. There were only 16 Jain students receiving instruction at the University but he hoped their number would grow.

THE HOSTELS.

They had constructed three large hostels which accommodated about eleven hundred students. The first hostel was occupied by 312 students of College of Arts and Science. It was built by the handsome donation of three lakhs given by Raja Baldeo Das Birla and would be called the "Raja Baldeo Das Birla Hostel". The second hostel also accommodated 312 students of the College of Engineering. Rai Sahib Sangi Das Jesiram had contributed Rs. 2½ lakhs for it; and another benefactor of the University had contributed Rs. 50,000. It would be called the "Sangidas Shapurji Barocha Hostel". The northern wing of the Hostel No. 1 would be called the Ramcharan Das Bahaadur wing in commemoration of his gift of Rs. 75, 000 for a hostel in the University. The northern wing of the Hostel No. 2 would be called the "Mangaldas Girdhardas Parekh Wing." The northern side of the southern wing of the Hostel No. 2 would be called the "Bhateley Shyam Sundar Wing." The donations of other donors for

hostel accommodation would be commemorated by tablets to be placed over the rooms on the southern side of the southern wing of Hostel No. 2. The third hostel accommodated over four hundred students. Half of it was occupied by the students of the Colleges of Theology and Oriental Learning and the other half of those of the Colleges of Arts and Science. The Colleges of Oriental Learning and Theology were accommodated in that Hostel. The hostel was constructed by the donation of Rs. 2, 53,000 of which one lakh was given by Rai Bahadur Seth Ram Narayan Ruiya, and rupees 51 thousand each by his brother Seth Surajmal Ruiya, and Seth Shantidas Asakaran and Seth Manni Lal Jugul Kishore all of Bombay. A large tablet would be put in that hostel to commemorate the gift of those donors. Another block was under construction in that hostel and when completed it would be called the "Parbatibai Jain Ashram" in commemoration of the gift of Babu Jiwan Lal Pannalal and his brothers, Babus Mohanlal and Bhagwan Lal of Bombay.

They had collected nearly one crore of rupees up to that time. The accounts were audited by the auditors appointed every year by the Court, and besides being sent to registered donors, i. e. those who had subscribed Rs. 500 or more they were published every year in the Government of India Gazette. The audited balance sheet was circulated among the members of the Court. The proceedings of the Council were placed before them every year for their information. The University office was open to every member of the Court who might wish to obtain any further information. With the permission of the Pro-Vice-Chancellor, he could see any book or voucher in order to satisfy himself about the correctness of their accounts.

The progress which had been achieved by the University in the brief space of five years was a matter for supreme thankfulness. The credit for it was due, in the first instance,

to the donors who had so generously helped the institution by their donations. It was in the second place due to those who had spent time, thought and energy in planning its constitution and work, and guiding its operations, at the head of whom stood their first Vice-Chancellor, the late Sir Sundarlal. It was also due to the members of the University, of the Court, the Council, the Senate and the Syndicate, and to the staff and students who had each contributed his own quota to the growth of the institution. Their gratitude was also due to the Government and to the Indian States for the support they had received from them, and without which they could not have prospered as they had. Where so much had been achieved in so short a period of time, and all by non-official, and largely honorary agency, it would be surprising if no mistakes had been committed, and if there was no room for criticism. But he ventured to think that taking every thing into consideration, the mistakes had been few and that they were capable of explanation. Being a public institution, the University was naturally exposed to criticism. It welcomed criticism when such criticism was put forward in a responsible manner as had been done in the past by their honoured friend *Babu' Bhagawan Das*. The University tried to meet the criticism, adopt suggestions for improvement where it could and where it could not, to explain reasons for not being able to do so. But the Court would not expect the University authorities to take notice of anonymous criticism when the man who put it forward had not the fairness to disclose his own identity and to take the responsibility of publishing such criticism. It requires neither courage nor conscience to criticise any individual or institution anonymously. They had recently an instance of that type of a critic. 75 Questions relating to the affairs of the University had been printed and circulated among students and sent to the Patrons and Members of the University by some one who had considered it discreet

not to disclose his name. He also had received a copy of those questions. The paper on which the questions were printed not only did not bear the name of the person who got them printed but even that of the press in which they were printed. He did not propose therefore to take any notice of those questions. The printed proceedings of the Council, the budget and the audited balance sheet gave all the information which they might require, and the statement he had made or would make in the course of their proceedings would supplement it wherever it would be needed. He would be glad to furnish any further information which any member of the Court would ask for.

The Vice-Chancellor concluded with an expression of gratitude to all who had co-operated in the building up of the University and hoped that the work which had been so well begun would be carried on with enthusiasm until the institution would attain full development. (Loud applause).

After the Vice-Chancellor had concluded his address the following business was transacted :

1. Prof. P. Seshadri moved :

"That the Vice-Chancellor's Report be recorded."

The Hon'ble Mr. Justice Kanhaiyalal seconded the motion.

The motion was then put to the vote and carried.

2. Prof. P. Seshadri said that he had given notice to the effect that Mr. K. L. Datta and Pandit Iqbal Krishna Munshi Gurtu be re-appointed Honorary Auditors under Sec. 13 (1) of the Benares Hindu University Act, for 1922-23, but he found that one of those gentlemen could not come at all during the year to share the work of auditing and Pandit Iqbal Krishna Munshi Gurtu did it at the last moment. The position therefore was that much difficulty was felt from

year to year in getting the accounts audited by honorary auditors. He would therefore like to withdraw the proposal of which he had given notice and would move that Messrs R.S. Batliboi & Co. of Calcutta be appointed for the purpose, and that they should be paid a sum of Rs. 1,000 as their audit fee. He formally moved :

“That Messrs R. S. Batliboi & Coy. of Calcutta be appointed Auditors under Section 13 (1) of the Benares Hindu University Act for 1923-24 on a fee of Rs. 1,000.”

Pandit Ramakant Malaviya seconded the motion :

The motion was put to the vote and carried.

- 5 Pandit Ramakant Malaviya, and
- 6 Babu Govindadas

- (b) The election of two members of the Council under Statute 17 (?) from amongst the members of the Court residing in places outside the United Provinces of Agra & Oudh was then taken up

The Pro Vice Chancellor reported that out of these two vacancies one was for the full term of 3 years and the other for the residue of the term of the late Rai Purnendu Narayan Sinha Bahadur

Names were proposed and the following gentlemen were declared duly elected.

Babu Devi Prasad Khastan for the full term of 3 years
The Hon'ble Babu Ganesh Datta Singh for the residue of the term of the late Rai Purnendu Narayan Sinha Bahadur

4. The election of two members of the Board of Appointments in place of those whose term had expired was taken up :

Principal A. B. Dhruva moved :

"That the following gentlemen be elected or re-elected to the Board of Appointments under Statute 27 (iii) :

Rai Bahadur Pandit Baldevram Dave, and
The Hon ble Justice Kanhaiyalal.

As there was no other proposal before the Court the gentlemen proposed were declared duly elected.

5. The election of a member of the Senate under Statute 19 Class II clause (a) in place of Dr. G. N. Chakravarti whose term expired on the 29th November, 1923, was taken up :

Prof. P. Seshadri moved :

"That Dr. G. N. Chakravarti be re-elected to the Senate."

As there was no other proposal before the Court, Dr. G. N. Chakravarti was declared duly elected.

6. The report of the Syndicate on the proposal of the Committee appointed to consider and make definite proposals for the Religious Instruction of the Jain students of the University and to report about the funds that had been provided for the purpose was read :

Prof. P. Seshadri moved :

"That the Syndicate's Report be adopted"

In doing so he said that the Syndicate considered the matter and recommended that one period per week should be set apart for religious instruction to Jain students as in the case of Hindu students in the Arts College, and that separate

provision in one of the hostels should also be made for Jain worship for the Swetamhar and Digambar students. The Syndicate also requested the Council to take early steps to make the necessary arrangements for the teaching of Jain religion. Steps were taken by the Council in the matter. It was therefore desirable that the Court should accept the report.

Babu Ajit Prasad seconded the motion.

The motion was then put to the vote and carried.

Prof. P. Seshadri moved .

“That the next annual meeting of the Court be held in December, 1924.”

Babu Guru Prasad Dhawan withdrew his proposal relating to this and seconded the motion of Prof. P. Seshadri.

The motion was then put to the vote and carried.

8. Babu Jnanendranath Basu moved .

“That the report of the Committee appointed to report what changes should be introduced in the Hindu University Act and Statutes be adopted with such amendment as may be deemed necessary.”

The Chairman remarked that the report, the adoption of which was moved by Mr. Basu, was an important one and it would naturally take some time before they could adopt it. It was 2 o'clock and at 2-30 they had to attend the All-India Debate organised by the University Parliament. It was therefore desirable that they should adjourn the meeting to the next day.

The meeting was then adjourned to Monday, the 21st January, 1924, at 4-30 p.m.

1 The report of the Committee appointed by the Court at its meeting held on the 12th December, 1924 to report what changes should be introduced in the Hindu University Act and Statutes was taken up for consideration.

Babu Ajit Prasad said - "I have to make a preliminary objection to the report being adopted at this stage. I received only on the 16th instant a copy of the amendments proposed by no less than 8 members of the Court in the Draft Statutes

recommended by the Committee. But I am afraid these proposals have not been thoroughly considered by the Committee. So far as I have been able to judge there are one or two substantial changes recommended by the Committee with regard to the proposed amendment. But the other changes are more or less verbal. The amendments if I may say so cover points which may be called uncontested points. But the Committee neither adopted them nor did they give any reason as to why those points were rejected."

The Pro-Vice-Chancellor, interposing, said that all the amendments that were received were thoroughly discussed and considered by the Committee

Babu Ajit Prasad continuing said; "But the report does not give any reason. There may be reasons for their being rejected but in the report we find nothing. In view of this the question is whether the Court will allow every one of those amendments to be moved here at this meeting? Of course if a member does not want to press his amendment you will save time.

"Then, again, Sir, I think it is hardly possible to go through all these amendments in the time that is at our disposal, therefore, my submission is that the report be remitted back to the Committee with the instructions that those members who have proposed amendments may be invited to discuss their proposals before the Committee. If the members will be satisfied as to the undesirability of their proposal they would naturally withdraw their amendments otherwise the Committee will have to accept them. But if this course is not considered proper then this matter should be postponed to a special meeting of the Court. It will undoubtedly take hours if not days to go through the report. I do not think that the work can be done in an hour or two. In my opinion it is not desirable to adopt the report in a hurry.

I do not think it necessary to go into details as to the points I have explained but if it is required of me I have no objection to do so now."

The Vice-Chancellor observed : " I think that Babu Aji Prasad's anxiety that the report should not be disposed of in a hurry is proper and justified. But I think his object will be served if we can get on not in a hurry for a single moment but rapidly on certain matters which are likely to be uncontested. If we cannot finish it to-day we may adjourn the meeting to tomorrow and if need be to the day after and in these meetings if members come forward to press their amendments we shall discuss them. But I do not think it advisable to hold a special meeting of the Court for this purpose as it would mean a good deal of expenditure of money, nor do I desire to refer the matter back to the Committee. We shall not dispose of any point in a hurry. We shall go on considering every item carefully and come to a decision with the full assent of the house.

Mr Aji Prasad : "I agree."

The Chairman then invited discussion on that part of the report which dealt with the Act.

After a careful consideration it was

Resolved that the provisions of the Act as modified in the meeting be adopted. (Vide Appendix)

The Chairman then invited discussion on that part of the Report which dealt with the Statutes and also on the amendments that had been received in connection thereto.

After some discussion the meeting was adjourned to the 22nd January, 1925 at 11 P. M.

- (e) all other matters relating to the administration of the University.

(2) The first Statutes shall be those set out in Schedule 1.

(3) The Court may, from time to time, make new or additional Statutes, or may amend or repeal the Statutes.

(4) The Council shall have power to draft and propose to the Court, Statutes to be made by the Court, and it shall be the duty of the Court to consider the same

(5) All new Statutes or additions to the Statutes or amendments or repeals to Statutes shall, *before coming into effect* require the* approval of the Chancellor, who may sanction, disallow, or remit for further consideration :

Provided that no Statute making a change in the constitution of the Court, the Council, the Senate or the Syndicate, as provided for in the first Statutes, shall come into effect until it has received the sanction of the Governor-General in Council

18. (1) *The University shall constitute for the benefit of its teachers and other servants such pension or provident funds as it may deem fit in such manner and subject to such conditions as may be prescribed by the Statutes.*

(2) *Where such pension or provident fund has been so constituted, the Governor-General in Council may declare that the provisions of the Provident Fund Act 1897 shall apply to such fund as if it were a Government Provident Fund.*

19. (1) Subject to the provisions of this Act and the Statutes, the Regulations may provide for any or all of the following matters, namely :—

- (a) the payment of fees to the University and their amount ;
- (b) the admission of students to the University and their examination ;
- (c) the tenure of office and terms and manner of appointment and the duties of the examiners and examining boards ;

APPENDIX B.

(Vide Resolution No. 4 of the meeting of the Syndicate held on the 6th of February, 1924).

Proceedings of a meeting of the sub-committee appointed by Resolution No 8 of the Syndicate meeting of the 14th November, 1923, to consider the report of Lord Lytton's Committee on Indian students in England, held at 3 P. M. on Saturday, the 15th of December, 1923, in the Pro-Vice-Chancellor's Room of the Central Hindu College.

PRESIDENT :

The Pro-Vice-Chancellor,
Professor L. D. Couselant,
Professor Gurmukh N, Singh, (By invitation), and
Professor P. Seshadri (*Convener*).

Read letter from the Government of the United Provinces, inviting the opinion of the Benares Hindu University on the main recommendations of the Lytton Committee on Indian students in England.

Resolved that the following recommendations be made to the Syndicate:—

- (1) The University approves of the proposal to replace the present Provincial Advisory Committees by Advisory Bureaux attached to Universities to provide information to students proceeding to England and to facilitate their admission into the Universities concerned, the expenses of the Bureaux being met by special grants made to the Universities by Government.

- (2) The University approves of a Central Agency in England for all the Universities in India, to deal with the admission of students from India into British Universities, but the University trusts that it will have a voice in the selection of the personnel of the Agency.
- (3) The University approves of the idea of holding an Inter. University Conference in India and of establishing a standing Inter. University Board.

(Sd.) P. SESHADRI,
Convener.

APPENDIX C.

(Vide Resolution No. 5 of the meeting of the Syndicate held on the 6th of February, 1924).

Proceedings of a meeting of the sub-committee appointed by Resolution No. 10 of the Syndicate meeting on the 14th November, 1923, to report on the conditions proposed by the Mysore University for the exchange of Professors held at 2.15 P. The Commissioner,
Benares Division, Benares

Dated Benares, the 17th January, 1924.

Sir,

I have the honour to refer you to your letter No. 3094/VIII-3 dated 23rd June, 1923 in which you sent me at my request the instructions of Government in regard to the payment of revenue on the land acquired for the Hindu University. I wrote to you because the file on the subject had been lost from my office probably as long ago as 1920, and I could find no authority for the contention of the Assistant Secretary to the University Council that Government had sanctioned a remission of revenue as the land acquired was excluded from cultivation. The enclosures to your letter have shown that his contention was right, the principle accepted by

Government on the recommendation of the Board of Revenue being as follows —

“The Collector, therefore, with the approval of the Commissioner and the concurrence of the University Authorities has proposed that the case may be dealt with in the following way viz, that the whole area should from the date on which possession was given over be treated as a *separate mahal* of its own and be assessed to a revenue, with cesses, amounting to Rs 139, 35 for the 2nd half of the revenue year 1324 fash (the former proprietors have already paid the half revenue for the 1st half of that year) and to a revenue with cesses of Rs 2,794 6 10 for the year 1325 fash reduced proportionately for any portion of the area brought under works during the year 1324 fash. He also suggests that a similar reassessment should take place every year on the basis of similar reductions, until the whole area becomes utilised for the purposes of the University. The reductions would involve merely proportional calculations e.g., if the whole area be considered as being 1000 acres paying 25000/- revenue and 100 acres be taken from cultivation and put under works during the agricultural year, the revenue for the next year will be reduced by one tenth or Rs 250/-.”

In view of these instructions I directed that enquiries should immediately be made as to the portion of the Hindu University area which had come under works. The Assistant Secretary did not however agree to the calculations made by the Tahsildar or Subdivisional officer, and he claimed that a reduction of revenue should have retrospective effect back to 1325 F. It appears that in spite of the Government instructions which were presumably communicated to him, he has regularly paid in the full revenue since 1325 F and

for several years he has put in no claim to remission. I decided ultimately to go round the grounds myself and determine what portions could fairly be classed as under works at the end of 1330 F ; and whether any satisfactory method could be evolved for discovering the position in the intervening years.

My inspection, which threatened at first to take up a good deal of time, was very much facilitated by the fact that the University has a lay-out plan of its grounds, in which the whole is divided into blocks. On the basis of this plan it struck me that my simplest course would be to examine each block separately and then to class each under one of the two heads (1) under works (uncultivated) or (2) not yet under works (cultivated). The proportion of (1) to total area multiplied by the full revenue would then determine the amount of revenue to be remitted. In following this course I considered that it would be a reasonable interpretation of the Board's proposals as approved by Government to regard roads, play-grounds, gardens and brick kilns as under works in addition to the actual areas which contained completed or semi-completed buildings. In the attached plan I have marked all blocks under works with a circle, and all those cultivated or not yet under works with a cross. In a few instances a block under the former category contains a grove or a little cultivation in a corner, but I have not thought it worth while to take separate account of that. The result is as follows:—

| Village | Area acquired by University | Cultivated (Not yet under works) | Uncultivated (under works). |
|------------------|--------------------------------|--|-----------------------------------|
| Nagwa. | 36.04 | 29.84 | 6.18 |
| Bhagwanpur. | 93.24 | 35.40 | 57.84 |
| Chittupur. | 191.28 | 89.29 | 101.99 |
| Naria. | 295.42 | 10.12 | 285.30 |
| Dhanarjenpur. | 122.93 | 11.45 | 111.48 |
| Khajuhi. | 52 | 24.64 | 27.36 |
| Janganpur. | 75.68 | 51.26 | 24.42 |
| Suruahi. | 133.11 | 113.20 | 19.91 |
| Sir Gobardhanpur | 214.53 | 174.33 | 40.20 |
| Total... | 1214.21 | 539.53 | 674.68 |

If this system is approved the revenue to be remitted for 1330 F will then be $\frac{674.68}{1214.21} \times 2794\frac{5}{6}/10$ (the full Land Revenue). It remained to be considered what was to be done on account of previous years. I proposed to the Assistant Secretary, and he agreed to the following course: that, as it would be a most laborious task in the absence of any record on his part, to work out from patwari's papers since 1325 F the actual area which had come under works in each year (even if those particulars could be made available) a progressive remission should be granted for each amounting to $1/6$ for the first year, $2/6$ for the second and so on of the revenue to be remitted for 1330 F. Thus the remission for 1325 F would be

$$1/6 \times \frac{674.68}{1214.21} \times \text{Revenue}$$

For 1326 F,

$$2/6 \times \frac{674.68}{1214.21} \times \text{Revenue.}$$

and so on. For 1329 F it would be

$$5/6 \times \frac{674.68}{1214.21} \times \text{Revenue}$$

The net remissions work out as follows :—

| | | | |
|-------------|------|----|----|
| 1325 F..... | 258 | 12 | 7 |
| 1326 F..... | 517 | 9 | 3 |
| 1327 F..... | 776 | 5 | 10 |
| 1328 F..... | 1335 | 2 | 6 |
| 1329 F..... | 1293 | 15 | 1 |
| 1330 F..... | 1552 | 11 | 9 |
| Total.. | 5434 | 9 | 0 |

I hope this system will approve itself to you and to the Board of Revenue. I admit that it may be far from correct for any one year, but it should work out fairly accurately on the whole series of years together : and I am at a loss for any better course to pursue, if you agree with me that the remission should have retrospective effect. It has further the merit of being a simple solution of rather a troublesome problem.

As the whole revenue of 2794/6/10 has been paid till the end of 1330 F, the Board's approval will presumably take the form of a sanction to the refund of 5434/9/0.

Your file on the subject which I have meanwhile retained for reference is herewith returned

I have the honour to be,

Sir,

Your most obedient servant,

The Board discussed a possible re arrangement of the Examinations for the B Sc Part I and B Sc Part II in Mechanical and Electrical Engineering with a view to obtaining greater efficiency in the sessional work of the students especially in the production of complete working drawings and designs

The Board came to the conclusion that this could be met by replacing a few of the short four hours Examinations which involve the execution of drawings and designs, by drawings and designs executed by the candidates during the preceding session These duly certified by the Professors, who will act as Internal Examiners, to be submitted at the time of the Examination and placed before a duly appointed Board of Examiners for inspection and valuation

The papers to be replaced by designs and drawings or projects executed during the session to be

1 The Board unanimously adopted the Syllabuses (vide Annexures A and B) as revised, for the Intermediate and the B Sc Examinations of 1926 and the following years.

2 The Board unanimously recommended that, the subject for the Honours paper for the B Sc, Examination of 1925 be "An extended study of Plant Physiology."

BOOKS RECOMMENDED

- (1) Palladin's Plant Physiology
- (2) Jorgensen and Stile, Carbon Assimilation
- (3) Dixon—Ascent of Sap
- (4) Bose—The Physiology of the Ascent of Sap
- (5) Darwin—The Physiology of the Movement of Plants (New Phytologist Reprint)
- (6) Jorgensen & Stile, Studies in Permeability (New Phytologist reprint)
- (7) Jost - Lectures in Plant Physiology.

Convener.

ANNEXURE A.

SYLLABUS IN BOTANY FOR THE INTERMEDIATE

EXAMINATION.

There will be one paper and a practical examination of not more than three hours.

Distinction between living and non-living matter; the distinctive properties of protoplasm, distinctions between animals and plants.

A general outline of the study of the living plant with a view to understand the way in which it is constructed and the various life-phenomena it exhibits including:—

(a) An elementary knowledge of the external structure (Morphology) of its various parts, such as, Root, Stem, Leaf, Inflorescence, Flower, Ovule, Fruit and Seed. The differentiation and development of these parts from the seed during germination. The origin and evolutionary tendencies in these parts.

(b) An elementary knowledge of the structural units, Cells (Histology) of the plant body and the way in which they are organised to give a co-ordination of functions:—The vegetable Cell, its contents and their recognition by micro-chemical tests, its method of division and its general physiology, such as, Osmotic pressure, Permeability, etc: formation of important tissues, such as, the Meristematic Tissues and their differentiation into the various permanent tissues: the formation of important tissue-systems, such as, the Dermal, the Mechanical, the Absorptive, the Vascular, the Assimilatory, and the Respiratory, tissue systems.

(c) An elementary knowledge of the functions carried on by the living plant together with a study of its energy

relations (Elements of Plant Physiology)—The physiology of the cell; a general survey of the structure of the plant body as adapted to its functions, the energy and material balance-sheet of the plant body including a discussion of:—1, the gain of matter to the plant body by processes of absorption by roots and other organs, 2 the movements of materials to places where they are required by process of Root-pressure, Transpiratory current, Cell diffusion etc, 3. the gain of potential energy by conversion of simple substances into complex organic living and non-living matter by constructive processes of metabolism in Autotrophic and Heterotrophic plants (CO_2 assimilation, Parasitism, Saprophytism &c.) 4. the expenditure of energy in performing work of various kinds such as growth irritability, reproduction etc, and 5. the removal of waste matter in the form of secretion, excretion &c

(d) An elementary knowledge of —the Physiology of Reproduction, the Sexual and Asexual modes of Reproduction and their significance; Pollination and 'Fertilisation' and the agencies by which these are secured. Methods of propagation in space by dispersal of Fruits and Seeds.

(e) Outlines of Evolution —Variation, Heredity and Mendelism to be treated in a very elementary manner.

General outlines of the Classification of the plant kingdom illustrated by a knowledge of the structure, functions, life-history, and relationships of —

Bacillus; Yeast, Phytophthora; Mucor, Euglena; Ulothrix, Spirogyra; Riccia; Funaria; Pteris, Cycas; Nymphæa; Argemone, Pisum; Ricinus; Cucurbita; and Helianthus.

Outlines of the principles of systematic classification of the Angiosperms into principal groups.

PRACTICAL WORK.

Candidates shall be required to examine microscopically the gross parts of, and to dissect and describe specimens of plants included in the above syllabus. They shall also be required to perform simple laboratory experiments to understand the various physiological processes carried on by the plant.

They shall also be expected to keep a record of all practical work done in the laboratory in a note-book, which will be liable to examination by the University Examiner.

The following books are suggested as suitable :

Tansley : Elements of Plant Biology

Hutchinson .—Popular Botany.

Thoday Botany, A Text book for Senior Students.

Pfleiderer : Glimpses into the Life of Indian Plants.

Gager · Fundamentals of Botany.

Dulgeon: Guide to Intermediate Practical Botany.

ANNEXURE B.

B. Sc EXAMINATION.

Botany (Pass Course)

There will be two papers, each of three hours' duration and a practical test. There will be 100 marks for each paper, and 100 marks for the Practical Examination.

Paper 1.

Distinction between living and non-living matter: the distinctive properties of protoplasm. distinction between plants and animals.

A general outline of the study of the living plant with a view to understand the way in which it is constructed and the various life phenomena it exhibits, including,—

A- A knowledge of the external structure of its various parts (Morphology) :—

The Root, its modifications and its equivalents in the lower plants ; the Stem ; and its origin from simple thallus forms. The Leaf and its equivalents in the lower organisms special, adaptations of leaves and the origin of leaf structure from simple thalloid forms. The Inflorescence ; the Flower and its modifications ; the homology of the various parts of the flower, the origin and the evolution of floral structure, its equivalents in the lower plants and the special advantages of floral structure. The ovule ; Pollination and Fertilisation, self and cross-pollination and the agencies, the post-fertilisation changes The development of the Zygote and the Embryo. Fruits and Seeds and their dispersal. The morphological changes attendant upon germination.

B. A knowledge of the gross and minute internal structure of the plant body (Anatomy and Histology).

The cell, its contents, its methods of division: organisation of cell communities for co-ordination of functions by formation of Tissues and Tissue-systems.

The internal structure of the stem in the Vascular and the Non-vascular plants. Various kinds of Vascular construction e. g. Protostelic, Solenostelic, Dictyostelic, Monostelic, Schizostelic and Plustelic etc. and their sequence in evolution. Secondary growth in thickness. Structure of the Root in various groups of plant kingdom, its secondary growth in thickness and the origin and evolution of root structure. Structure of the leaf and the origin and evolution of leaf structure, various types of construction of leaf structure e. g. Dorsiventral, Bilateral, Centric, Xerophytic, Hygrophytic etc.

Internal structure of the reproductive organs: the changes that take place in the Division of the reproductive cells. Fundamentals of Alternation of Generations: the internal structure of male and female gametophytes. The Internal changes attendant upon fertilisation: the development of the Zygote and the germination of the seedling.

C. A knowledge of the Functions carried on by the plant and of its energy relation- including a study of:—

1. The detailed physiology of the Cell: The general chemistry of the protoplasm and other Organic and Inorganic substances that are incorporated in the living plant as working units: distinctions between Colloids and Crystalloids and their special properties; principal types of chemical reactions in the plant body including enzymic reactions which bring about a conversion of one substance into another. The general principle of physico-chemical equilibrium of vital reactions-Liebig's "Law of Minimum" and Blackman's "Law of Limiting Factors."

ii. The gain of matter by plant body: the chemical substances required by the plant, their composition and sources of supply, the Soil and the atmosphere. Processes of absorption by roots: the absorption of gases by aerial organs, the mechanism of gaseous exchange in plants, the absorption by various other organs e. g. Haustoria, Water-absorbing Organs etc., Theory of Selective absorption and Antagonism of salts.

iii. The movement of substance in the plant body: Root pressure; movement of water and the transpiratory current; cellular diffusion of gases and other substances and the part played by permeability; the movement of organised substances in the plant body.

iv. Gain of potential energy by constructive processes of metabolism.—The ultimate source of energy and the quantity absorbed by the plant for constructive purposes; the process of CO_2 assimilation of heterotrophic plants such as Parasites, Saprophyte and Carnivorous plants.

v. Conversion of potential energy into kinetic energy in destructive metabolism.—Respiratory processes in various organisms, e. g. Sulphur Bacteria, Iron Bacteria, Nitrite and Nitrate Bacteria. Acetic acid Bacteria etc. Respiration in higher plants; anaerobic respiration and alcoholic fermentation; respiration of succulents, the energy liberated in respiration and the energy balance sheet of the plant.

vi. The waste products of destructive metabolism and the material balance sheet of the plants.

vii. The work done by the plant.—Growth: growth in length; growth in other ways; mechanism of differentiation and development; irritability; various forms of irritability, the mechanism of perception of stimulus; conduction and response. Reproduction; sexual and asexual, conditions

favouring these ; physiology of reproduction and the physiological nature of reproductive elements and hereditary units.

viii. Organism as a whole and the Environment :—

Principles of harmony between the organism and the environment, disturbance of equilibrium; adjustment and adaptation; plant communities.

D. Plant in its relation to space; General principles of Geographical distribution.

E. Plant in its relation to Time: Evidences of Evolution. Pre-Darwinian, Darwinian and post-Darwinian theories of Evolution and Origin of species Variation, Heredity and Mendelism and its applications.

Paper 2.

Classification of plants into main groups illustrated by a detailed study of the structure, functions and life histories of the following in addition to those included in the Intermediate syllabus :—

A. Thallophyta :—

Nosloc or Oscillatoria.

i. Algæ—Chlamydomonas; Volvox; Ploverococcus; Vaucheria; Coleochaete; Oedogonium, Diatoms.

Ectocarpus; Sargassum; Fucus. Dictyota.

Batrachospermum.

ii. Fungi :—

a. Phycomycetes :—Pythium; Saprolegnia.

b. Ascomycetes :—Eurotium; Humaria.

c. Basidiomycetes :—Puccinia; Agaricus.

B. Bryophyta :—

i. Hepaticæ :—Marchantia; Anthoceros.

iii. Musci :—Sphagnum.

C. Pteridophyta :—

- i. Equisetales :—Equisetum.
- ii. Lycopodiales :—Selaginella.
- iii. Filicales :—Gleichenia ; Marsilia.

D. Gymnosperms :—Pinus ; Gnetum.

Principles of classification of Angiosperms illustrated by a general study of the following families :—

A. Monocotyledons :—Gramineæ ; Palmæ ; Aracacæ ; Liliacæ ; Musacæ ; Orchidacæ.

B. Dicotyledons :—Salicacæ , Moracæ ; Chenopodiaceæ ; Amarantaceæ . Ranunculaceæ . Anonaceæ ; Papaveraceæ ; Cruciferae , Rosaceæ ; Leguminosæ ; Rutaceæ ; Meliaceæ ; Euphorbiaceæ ; Anacardiaceæ , Rhamnaceæ ; Myrtaceæ ; Malvaceæ ; Umbelliferae , Asclepiadaceæ ; Labiatæ , Solanaceæ ; Rubiacæ ; Cucurbitaceæ ; Compositæ.

PRACTICAL WORK.

The candidates shall be required (a) to examine and describe microscopic specimens, (b) to prepare and stain microscopic sections of plants and plant tissues, (c) to dissect and describe the plants and parts thereof, and (d) to refer the plants to their positions in the foregoing syllabus for classification.

They shall also be required to perform fundamental experiments in plant physiology.

A record of all the practical work done in the laboratory and the field must be produced at the time of the practical examination.

The following books are suggested :—

Strasburger : Text-book of Botany.

Stevens—Plant Anatomy.

Hardy—Introduction to Plant Geography.

Marie Stopes—Fossil Plants

Coulter, Barnes and Cowles—Text Book of Botany
.. 2 Vols

Willis—Flowering Plants and Ferns

Lock—Variation, Heredity and Evolution

Reynolds Green—Plant Physiology

Darwin and Acton—Practical Plant Physiology

Kerner and Oliver—Natural History of Plants

Scott—Evolution of Plants

1. (a) Read letter No. 212 dated the 31st of January, 1924, from the Secretary to the Government, Education Department, conveying the sanction of His Excellency the Governor-General-in-Council with regard to the amendment proposed by the Senate in Group C of Regulation 5 of Chapter XXVII making "Drawing" and "Music" two separate subjects of study.

On the motion of Professor P. Seshadri, seconded by Professor M. B. Rane it was

Resolved that the letter be recorded.

- (b) Read letters Nos. 130/G/255-1916 and 65E dated the 15th and 29th of February, 1924, respectively,

from the Secretary to the Government, United Provinces, conveying the approval of His Excellency the Visitor with regard to the amendments proposed by the Senate to regulations 5,24 and 9 of Chapters XXVIII, XXXIX, XXXII, XXXIV and XXXVIII respectively

On the motion of Professor P. Seshadri, seconded by Professor M. B. Rane it was

Resolved that the letter be recorded

2. On the motion of Professor Gurmukh N. Singh, seconded by Professor M B Rane, Dr. H. R. Mehra, was elected to the Syndicate for the residue of the term of Dr. Ganesh Prasad, resigned.

3. On the motion of Professor K K. Mathur, seconded by Dr. H. R. Mehra, Professor R. S. Jain was elected a member of the Senate for the residue of the term of Professor H. L. Chablam.

4. Considered the question of appointing a Board of Examiners for the valuation of the essays submitted for the Narsingh Prasad Hari Prasad Buch Metaphysics Prize for the year 1923-24.

On the motion of Professor P. Seshadri, seconded by Professor M B. Rane, it was

Resolved that a committee consisting of:—

- (1) The Hon'ble Dr. Ganga Nath Jha,
- (2) Principal A. B. Dhruva, and
- (3) Professor P. B. Adhikari,

with Professor P. B. Adhikari, as *Convener*, be appointed to value the essays.

5. Considered the question of prescribing the subject for the Narsingh Prasad Hari Prasad Buch Metaphysics Prize Essay and the Swami Sri Madhusudanand Sarasvati Shanker Vedant Prize Essay for the year 1924-25.

On the motion of Professor P. Seshadri, seconded by Professor M B Rane, it was

Resolved that the matter be referred to a committee consisting of —

- (1) Principal A B Dhruva,
- (2) Mahamahopadhyaya Pandit Pramatha Natha
Tarkabhusana, and
- (3) Professor P. B Adhikari,

with Professor P B Adhikari as *Convener*.

6. Professor P. K. Telang moved —

"That the recommendations of the Faculty of Arts relating to the changes in the courses of study in History for the Admission, B A , B. A. (Honours) and M A Examinations and the courses of study in Civics for the Intermediate Examination be accepted and be given effect to for the examinations of 1926 and subsequent years."

Professor P Seshadri seconded the motion

The proposition was put to the vote and carried.

7. Professor Shyam Sundar Das moved —

"That the recommendations of the Faculty of Arts relating to the changes in the courses of study in Hindi for the Admission, Intermediate, B A and M A. Examinations be accepted and be given effect to for the examinations of 1926 and subsequent years."

Pandit Chandra Maui Sukul seconded the motion.

The proposition was put to the vote and carried

8 Professor Gurmukh N. Singh moved —

"That the recommendations of the Faculty of Arts relating to the syllabus and text-books in Economics for the Intermediate, B. A. (Honours) and

M. A. Examinations be accepted and be given effect to for the examinations of 1926 and subsequent years.

Professor P. Seshadri seconded the motion.

The motion was put to the vote and carried.

9. Professor Gurmukh N. Singh moved :—

"That the recommendations of the Faculty of Arts relating to the syllabus and text books in Commerce for the Admission Examination be accepted and be given effect to for the examinations of 1926 and subsequent years."

In doing so he said that the only change in that connection was the deletion of "Shorthand" from the Commerce Course. At first they thought it desirable to incorporate it in the Commerce Course at the Admission Examination. But afterwards it was found by experience that it made the whole course heavy and students could not easily prepare it. Secondly, in the equivalent examinations of other Universities, Shorthand was not introduced as a subject of study. Thirdly the students at the Matriculation stage did not possess a sufficient command of the English language so as to be able to learn Shorthand with any advantage. It was, therefore considered advisable to drop the subject altogether.

Professor P. Seshadri seconded the motion.

The proposition was put to the vote and carried.

10. Dr. S. S. Bhatnagar moved :—

(a) That the recommendations of the Faculty of Arts, relating to the changes in the courses of study in Arabic and Persian for the Admission, Intermediate & B. A. Examinations be accepted and be given effect to for the examinations of 1926 and subsequent years,

K. K. Mathur seconded the motion.

The proposition was put to the vote and carried.

- (b) That the recommendations of the Faculty of Arts relating to the alternative course in Urdu prescribed for students who take up Hindi at the M. A. Examination be accepted and be given effect to for the Examination of 1925 and subsequent years.

Professor P. Seshadri seconded the motion.

The motion was put to the vote and carried.

- (c) That the recommendation of the Faculty of Arts relating to the changes in the courses of study in Urdu for the Intermediate and B. A. examinations be accepted and be given effect to for the examinations of 1926 and subsequent years.

Professor P. Seshadri seconded the motion.

The proposition was put to the vote and carried.

11. Professor Nilkamal Bhattacharya moved :—

- (a) That the recommendations of the meeting of the Faculty of Arts held on the 15th of March 1924 with regard to courses and text-books for the M. A. B. A. & Intermediate examinations in Samskrit be accepted and be given effect to for the examinations of 1926 and subsequent years.

Pandit Indradev Tiwari seconded the motion.

The proposition was put to the vote and carried.

- (b) That the following recommendation of the meeting of the Faculty of Arts held on the 15th of March, 1924, be accepted :—

“That at the M. A. Examination in Samskrit students may offer a thesis in lieu of composition (Paper V) in any subject which they have read in their courses of the said examination and that this modification may come into force from the examination of 1925.

Pandit Indra Dev Tewari seconded the motion.

The proposition was put to the vote and carried.

12. Pandit Indra Dava Tewari moved :—

“That the recommendations of the Faculty of Arts relating to the changes in the courses of study in Philosophy for the Intermediate, B. A., B. A. (Honours), and M. A. Examinations in Philosophy, be accepted.

In doing so he said that there was no change in the principles underlying the syllabus. Only certain changes with regard to text-books had been recommended. There were some books prescribed in the courses which were not available and it was therefore thought desirable by the Board of Studies in Philosophy to replace them by other books. The recommendations had already been accepted by the Faculty of Arts. He therefore hoped that his proposal would commend itself to the Senate.

Professor P. Seshadri seconded the motion.

The motion was put to the vote and carried.

13. Professor P. Seshadri moved :—

“That the recommendation of the Faculty of Arts relating to the changes in the courses of study in English for the Intermediate, B. A., and M. A. Examinations, be accepted and be given effect to for the examinations of 1926 and subsequent years.”

In doing so, he said that only changes in text-books had been made. One book had been replaced by another. The proposition which he moved had already been accepted by the Faculty of Arts. He therefore hoped that the Senate would also accept it.

Professor P. K. Dutt seconded the motion.

The proposition was put to the vote and carried.

14. Professor Shyam Sundar Das moved :—

"That the recommendations of the Faculty of Arts relating to the changes in the courses of study in Gujarati for the Admission, Intermediate, B. A. Examinations and for the alternative paper for the M. A. Examination in Hindi be accepted

Professor P. Seshadri seconded the motion.

The proposition was put to the vote and carried.

15. Dr. H. R. Mehra moved :—

- (a) That the recommendations of the Faculty of Science relating to the changes in the syllabus and text-books prescribed for the Intermediate., B. Sc. and B Sc. (Honours) Examinations in Zoology be accepted and be given effect to for the examinations of 1926 and subsequent years.

In doing so he said that some minor changes more or less of a verbal nature had been recommended for adoption by the Faculty of Science. The Faculty wanted that these should come into force for the examinations of 1925 and subsequent years but in view of the resolution of the Senate which laid down that changes in the courses of study should be made at least two years before the examination for which they were intended he had no objection to move that the recommendations of the Faculty should be given effect to from the examination of 1926 instead of 1925. He hoped the proposal would commend itself to the Senate.

Professor K. K. Mathur seconded the motion.

The proposition was put to the vote and carried.

(b) Dr. H. R. Mehra moved :—

"That the recommendations of the Faculty of Science, relating to the changes in the syllabus and text-books prescribed for the M. Sc. Examination in Zoology be accepted and be given effect to for the examination of 1925 and subsequent years."

In doing so, he said that the Board of Studies in Zoology discussed the desirability of re-grouping the M. Sc. papers and of discontinuing the detailed study of some special groups in the M. Sc. as alternative with a dissertation or Research Paper. After due deliberation they recommended that requirement of a detailed knowledge of certain subjects as given in the Prospectus should be discontinued. The existing courses required that a student should study "Embryology, Paleontology, and Zoogeography" for the fifth paper of the M.Sc. Examination in Zoology. The examiners set papers from the specialistic point of view. They thought that students were required to specialise in those subjects. But this was not the case. They never meant that students should specialise in those subjects. The courses were ordinary like other courses and they wanted that students should have only a general knowledge of those subjects. It was evidently due to a mistake that the paper was grouped in that way. Before his going to England he knew that the group was deleted but owing to some mistake it found its place again in the Prospectus. The Allahabad University had already realised the mistake and corrected it. The Board of Studies therefore recommended that the group should be deleted and an essay be substituted in its place. Further, it should be understood that by deleting the group of subjects from paper V it did not mean that they were altogether doing away with those subjects. On the other hand they had already provided for the study of those subjects in other papers.

Secondly, the Board recommended that 200 marks be fixed for the thesis instead of 100 marks. That was not a new departure so far as the Department of Zoology was concerned. The Departments of Botany and Chemistry had already adopted that change.

In his department, students were studying from the

beginning of the session on the lines explained by him, he therefore requested the Senate to accept his proposal.

Professor K. K. Mathur seconded the motion.

Professor P. K. Telang in opposing the motion, said that the proposal moved by Dr. H. R. Mehra would contradict the former resolution of the Senate passed at its meeting held on the 6th of January, 1919, which laid down that the courses of studies and text-books for each examination should be prescribed and notified at least two years before the examination in question. It was therefore not desirable to adopt the motion.

Professor P. Seshadri said that it was not necessary to change the courses every now and then. Besides, the proposition would go against a previous resolution of the Senate. If Dr. Mehra wanted to introduce the change at that stage for the Examination of 1925 he could do that either by getting the rules changed or by making his proposition an exception to that resolution.

Principal Charles A. King in supporting the motion said that changes in Science subjects should be given effect to as soon as it was thought desirable to do so. The study of Science was pursued throughout the world and discoveries were made in various Science subjects. It was possible that a single discovery might affect the whole course which they had fixed for an examination or the professors concerned might require their students to know its pros and cons. In such circumstances it would be absurd to wait for two years. It was very undesirable to do so. If there was any technical difficulty in the proposal of Dr. Mehra being adopted, Professor King observed that some member of the Faculty of Science should come forward to move a proposition to get the rule changed.

Besides, every student was eager to absorb any scientific discovery that was made in the scientific world and to

16. Professor P. S. Varma moved :—

"That the recommendations of the Faculty of Science relating to the changes in the syllabus and text-books prescribed for the B. Sc. Examination in Industrial Chemistry be accepted and be given effect to for the examinations of 1925 and subsequent years."

In doing so, he said that up to that time from the technical point of view, practically, no courses were prescribed for the B. Sc. Examination in Industrial Chemistry. The Board therefore considering their need, prescribed certain courses for the purpose and recommended them to the Faculty of Science. The Faculty of Science accepted them and sent them to the Senate for approval. The students were already reading those courses. He therefore hoped that the Senate would accept his proposal.

Dr. S. S. Bhatnagar seconded the motion and Professor P. Seshadri supported it.

"The motion was put to the vote and carried.

17. Dr. S. S. Bhatnagar moved the following proposal of which notice had been given by Professor Inamdar :—

That the following recommendation of the Faculty of Science be accepted :—

"That the Faculty recommends that a Bachelor of Agriculture of Indian Universities established by an Act of the Legislature be eligible for admission to the M. Sc. Courses of the Benares Hindu University."

Professor K. K. Mathur seconded the motion.

After some discussion, the mover withdrew the proposition by leave.

Dr. H. R. Mehra said that the Faculty of Science had recommended that at the end of Regulation 9 of Chapter

XXXII, a new group comprising of "Chemistry Zoology and Geology," be added This was already in the Regulations some three years ago But during his absence from the University, it was somehow or other deleted The group was an excellent one and found its place in the curricula of all the well known Universities of the world It was therefore desirable that it should be included in the regulation But the proviso which should be laid down in connection thereto was not there, he, therefore, liked to move the recommendations of the Faculty of Science with the necessary proviso

He then formally moved —

"That in Regulation 9 of Chapter XXXII the following words be added —

- (i) "(e) Chemistry, Zoology and Geology and that the present (e) be numbered (f)
- (ii) That in proviso of the Regulation "(e) be changed into '(f) and "(c) or (d) "into '(c) (d) or (e)"

Professor P S Varma seconded the motion

The motion was then put to the vote and carried

On the motion of Professor P Seshadri, seconded by Dr H R Mehra, the meeting was adjourned to Saturday the 12th of April, 1924, at 5 P M

No. 5

THURSDAY, THE 3RD OF APRIL, 1924, 5 P.M.

PRESENT :

Principal Charles A. King, *in the Chair*,

Professor M. B. Rane,

Dr. S. P. Agharkar,

Professor K. K. Mathur,

Dr. H. R. Mehra,

Professor N. P. Gandhi,

Dr. S. S. Bhatnagar,

Professor Y. Bharadwaja,

Professor H. L. Chhabber,

Professor P. K. Dutt,

Professor Syamacharan De,

Dr. N. K. Sethi,

Professor N. K. Tiwari,

Professor R. S. Inamdar,

Professor P. S. Verma,

Professor R. S. Jain,

Professor U. A. Asrani,

Professor Sukhdeo Pande,

Professor Badrinath Prasad,

1. Considered the following proposal of Prof. M. B. Rane :

"That the subjects for the Intermediate examination in the Faculty of Science shall be the following :

(1) English.

(2) Vernacular.

(3) Physics.

(4) Chemistry.

and any two of the following

(5) Mathematics.

(6) Biology (Botany and Zoology.)

(7) Geology."

After some discussion in which opinions for and against the proposition were expressed, Prof. Agharkar moved :

"That the discussion on the proposition be postponed to the next meeting of the Faculty of Science."

The motion after having been duly seconded was put to the vote and carried.

2. (a) Prof. K. K. Mathur moved :—

"That the following recommendation of the Board of Studies in Geology which met on the 5th of March, 1924, be accepted :

In Chapter XXVIII Regulation 9 Group B add the following further combinations :

(3) Chemistry, Biology and Geology.

(4) Physics, Chemistry and Geology.

Dr. H. R. Mehra seconded the motion, and Prof. N. P. Gandhi opposed it.

After some discussion Dr. S. S. Bhatnagar brought forward the following amendment :—

"That "Mathematics" be substituted for "Physics" in Group (4) of the proposition of Professor Mathur."

Professor K. K. Mathur accepted the amendment :

The proposition as amended was then put to the vote and carried, 17 voting for and one against it.

(b) Prof. K. K. Mathur moved :

"That the syllabus in Geology for the Intermediate Examination of the University as recommended by the Board of Studies in Geology at its meeting held on the 10th of March, 1924 be accepted."

Prof. Y. Bhardwaja seconded the motion :

The motion was then put to the vote and carried.

(c) Prof. K. K. Mathur moved :

“That the Report of the Board of Studies in Geology which met on the 5th and 10th of March, 1924 as accepted by the Faculty of Science be forwarded to the Senate for approval.”

Mr. H. L. Chhibber seconded the motion :

The motion was put to the vote and carried.

(Vide Appendix A).

3. Dr. S. S. Bhatnagar moved :

“That the report of the meeting of the Board of Studies in Chemistry held on the 1st of March, 1924 be adopted.”

Prof. P. K. Dutt seconded the motion, and Mr. Y. Bhara-
dawaja supported it

The motion was put to the vote and carried.

(Vide Appendix B.)

The meeting was then dissolved.

CONFIRMED

APPENDIX A

(- *Vide Resolution No. 2 of the meeting of the Faculty of Science held on the 3rd April, 1924*)

Report of the meeting of the Board of Studies in Geology held on March 5, and March 10, 1924.

(The following members were present :

Principal C. A. King, B.Sc., A.R.C.Sc.

Professor P. K. Dutt, M.A.

Mr. H. L. Chhibber, M.Sc.

Professor K. K. Mathur, B.Sc., A.R.S.M.,

(*Convener*).

Professor P. K. Dutt could not attend the adjourned meeting held on March 10, 1924.

(The following resolution was unanimously passed in the meeting held on March 5, 1924.

"The Board recommends that Geology be included as one of the subjects of study for the Intermediate Examination of the Benares Hindu University and that the following changes be made in the Regulations of the University.

In Chapter XXVIII Regulation 9, Group B add the following further combinations :—

(3) Chemistry, Biology and Geology.

(4) Mathematics, Chemistry and Geology."

The syllabus in Geology for the Intermediate Examination of the University was discussed in the adjourned meeting and it was resolved unanimously to recommend the syllabus given as an appendix to this report.

(*Vide Resolution No. 3 of the meeting of the Faculty of Science held on the 3rd April, 1924*).

A meeting of the Board of Studies in Chemistry was held on the 1st of March, 1924 at 4 P. M. and was attended by the following:—

Professor M. B. Rane.

Professor P. S. Varma,

Professor N. R. Dhar.

Professor M. M. Koppikar (by invitation).

and Professor S. S. Bhatnagar (Convener).

The following resolutions were passed:—

I. Resolved that the following modifications be made in the syllabus (year 1925) for the Intermediate Examination to be held in year 1926 and subsequent years.

- (a) On page 73 line 10 after Zinc add Cadmium. also in line 11 after Zinc add Cadmium also add in the end on page 73:—

Simple compounds such as oxide, chloride, sulphate, nitrate and sulphides of chromium, manganese, nickel and cobalt, alkali permanganates, Dichromates and chromates.

- (b) On page 74 after the 5th line add:—Elementary Organic Chemistry. Also in line 14 after Bi add:—Sn, Cd, Cr, Mn, Co, Ni, S,

- (c) Delete the last two paragraphs on page 75.

Resolved that the following changes be introduced in the syllabus (year 1925) for the B. Sc. Examination.

- (a) Delete the preparations in paragraph (6) p. 114 and add the identification of the following :—

Acetic Acid, Formic Acid, Acetone, Ethyl Alcohol
Benzene, Nitrobenzene, Acetaldehyde, Aniline
and Glycerine.

III. Resolved that the following addition be made in the syllabus of the M. Sc. Examination for Chemistry ;—

- (a) After Physical Chemistry add within brackets
“a knowledge of elementary crystallography will
also be required ”

IV. The Board considered the question of an Honours Course for the B.Sc. and they passed the following resolution ;—

Resolved that it be recommended to the Science Faculty that in the opinion of this Board it is desirable that the Honours School Scheme as framed by the Reforms Committee and adopted by the Senate should be put in force as soon as possible.

| | he joined. |

A. B. Dhruva,
Chairman.

At this stage the Vice Chancellor joined the meeting and took the chair

3 Read letter No E/52087 dated the 1st of March, 1924, from the Executive Engineer, Benares Hindu University, informing the Assistant Secretary to the Council that he has given increments to the establishment of his department as noted in his letter with effect from the 1st of February, 1924

Resolved that the Honorary Executive Engineer be informed that increments of salary can be given to the employees of the University in any department only with the previous sanction of the Council

Resolved further that the Executive Engineer be requested to recover the increments paid without sanction from the salaries of the members of the staff concerned.

Resolved that he be further informed that his proposals for the increments of pay and additions to the staff will be considered by the Council with the Budget of the next year

Resolved further that the matter with regard to the retaining of certain members of the staff in addition to those whose appointments have already been sanctioned by the Council, be referred to the Vice Chancellor for report

4 Read the report of the meeting of the sub committee appointed by the Council (under its Resolution No 2 of the 25th of April, 1923, to draw a scheme for the organisation of studies for women) held on the 8th of June, 1923

Resolved that the report be sent back to the sub-committee with a request that they should suggest an alternative scheme for providing instruction up to the Intermediate standard in Arts

5. Read the report of the meeting of the committee appointed by the Council (under its Resolution No 1 (b)

of the 1st of June, 1923, to make recommendations for converting the Central Hindu College Magazine into a University Magazine), held on the 31st of August, 1923.

Resolved that the report as modified be adopted (Vide Appendix).

Resolved further that Professor Seshadri be appointed Editor of the Magazine and the following gentlemen be appointed Assistant Editors :—

Mr. P. S. Varma,
Mr. M. M. Desai, &
Mr. G. P. Mehta.

Resolved further that the first issue of the Magazine be brought out in October 1924.

Resolved further that Principals of Colleges, Heads of Departments and University Professors and members of the staff be requested to help in conducting the Magazine.

6. The Secretary to the Estates Committee explained the details of the amount of Rs. 4,000/-required for Agriculture, Arboriculture, & the Estates Department (vide Resolution No. 5 of the meeting of the Council, held on the 29th of March, 24)

Resolved that the recommendation No. 3 of the meeting of the Estates Committee, held on the 9th of January, 1924, be accepted and a sum not exceeding Rs. 4,000/-be sanctioned for the purpose.

The meeting was then adjourned to Monday, the 14th of April, 1924, at 5 P. M.

APPENDIX.

(*Vide Resolution No 5 of the meeting of the Council held on the 11th April 1924*)

Proceedings of a meeting of the sub committee appointed by the Council (under its Resolution No 1 (b) of the 1st of June, 1923, to make recommendations for converting the Central Hindu College Magazine into a University Magazine), held at 4 P. M., on Friday, the 31st of August, 1923, in the Pro Vice Chancellor's Room of the Central Hindu College.

PRESENT

Principal A B Dhruva,
Professor P K Telang,
Professor P B Adhikari, and
Professor P Seshadri (Convener)

The following resolutions were passed —

1 That the Central Hindu College Magazine be transformed into the Benares Hindu University Magazine and published as a journal of eighty pages of the form and size of Reviews like the "FORTNIGHTLY" and the "CONTEMPORARY" thrice in the year

2 That three Assistant Editors be appointed every two years to represent Arts & Science

3 That there be a Sanskrit & Hindi Section in the Magazine consisting, for the present of eight pages

4 That there be a separate students' Section containing contributions from students of the University

5 That a section be devoted to University News

6. That the subscription be raised to Rs 2/ for students of the University and Rs 3/ for outsiders

That these changes be brought into effect from the beginning of the academical year.

1. (a) Professor P. Seshadri moved —

“That the following - recommendations of the Faculty of Oriental Learning relating to the changes in the courses of study in Sahitya and Vyakarana for the Pravesika Examination be accepted.—

- (i) To delete the first two tantras of Pan-chatantra and to prescribe “Shrutabodha.”

- (ii) To prescribe 2 to 5 Sargas of Raghuvarsa instead of 1 to 5.

- (iii) To prescribe the whole of Laghukaumudi

, Pandit Indra Deva Tewari seconded the motion.

The motion was then put to the vote and carried.

- (b) Professor P. Seshadri moved :—

"That the recommendations of the Faculty of Oriental Learning regarding a separate *sadharana* paper for the Shastri Examination in Jyotisha and Ayurveda be accepted."

Pandit Indra Deva Tewari seconded the motion. The proposition was then put to the vote and carried.

- (c) Professor P. Seshadri moved :—

"That the recommendations of the Faculty of Oriental Learning relating to the arrangement of the papers of the Acharya Examination in Sahitya be accepted :

ARRANGEMENT OF PAPERS.

| | | |
|-------|------|----------------|
| Paper | I. | Rasagangadhar. |
| Paper | II. | Dhwanyaloka |
| Paper | III. | Vyaktiviveka. |

Pandit Indra Deva Tewari seconded the motion.

The motion was then put to the vote and carried.

- (d) The recommendation of the Faculty of Oriental Learning relating to the extension of the period of study for the Madhyama Examination from two to three years was considered

Professor P. Seshadri moved :—

"That the recommendation be referred to the Faculty of Oriental Learning for re-consideration."

Pandit Indra Deva Tewari seconded the motion.

Pandit Prabhu Datta Shastri in opposing the motion said that the Faculty of Oriental Learning had already gone thoroughly into the matter and they considered it desirable that the period of study for the Madhyama Examination

should be extended from 2 to 3 years. In the circumstances of the case, therefore it was not advisable to refer the matter back to the Faculty.

The proposition was then put to the vote and carried.

(e) Professor P. Seshadri moved :—

“That the recommendations of the Faculty of Oriental Learning relating to the changes in the courses of study and text books in Sahitya, Vedant, Nyaya, Mimamsa and Dharmasastra be accepted.”

Pandit Indra Deva Tewari seconded the motion.
The proposition was put to the vote and carried.

2. (a) Professor P Seshadri moved :—

“That the recommendations of the Faculty of Theology relating to the extension of the period of study from two to three years for the Madhyama Examination be referred to the Faculty of Theology for re-consideration.”

Pandit Indra Deva Tewari seconded the motion.

Pandit Prabhu Datta Shastri opposed the motion.

The proposition was put to the vote and carried.

(b) Professor P. Seshadri moved :—

“That the recommendations of the Faculty of Theology relating to the reduction of papers from nine to eight for the Smritiratna Examination be accepted.”

M.M. Pandit Prabhu Datta Shastri seconded the motion.
The proposal was put to the vote and carried.

3. Professor R. S Inamdar moved :—

“That the recommendations of the Faculty of Science relating to the syllabus and text books for the Intermediate, B. Sc. and B.Sc. Honours Examinations in Botany be accepted.”

In doing so he said that the Board of Studies in Botany had revised the syllabuses of the Intermediate and the B. Sc. Examinations. The board had further unanimously recommended that the subject for the Honours paper for the B. Sc. Examination of 1925 should be "An extended study of Plant Physiology." The Faculty of Science had accepted these changes and recommended them to the Senate for approval. He further said that practically speaking there was very little change in the substance of the whole matter. Instead of putting the subjects in parts as had hitherto been done they put them in such a way that they would form one organised whole. This would afford facility to the students in the study of the subjects. Professor R. S. Inamdar then explained in detail the changes made in the text books and said that for the Intermediate Examination so far as the substance of the courses already prescribed was concerned, no change had been made. Only some books had been replaced by some better ones. As regards the B. Sc. Syllabus, besides the change in books one new book had been added, namely "Lock's Variation, Heredity and Evolution" because they wanted that the students should know the fundamental principles on which the plant life depended and from which it evolved. Concluding, Professor R. S. Inamdar said that the courses recommended by the Faculty of Science were very elaborate and he therefore hoped that the Senate would accept them.

Dr. H. R. Mehra seconded the motion.

The motion was then put to the vote and carried.

4 Professor L. D. Coneslant moved —

"That the recommendations of the Faculty of Science relating to the syllabus arrangement of papers and courses of study for the B. Sc. Examination in Engineering Parts I and II be accepted."

In doing so he said that up to that time they held a few short four-hours' examination in designs of Hydraulic Machines etc. at the B. Sc. Degree Examination Parts I and II. But experience taught them that these examinations should be discontinued. Students did not pay attention to the study of these designs, since they thought it very very difficult to sketch out a new design in four hours' time, however competent they were in the subject. Professors also realised the undesirability of the practice. It was absolutely impossible to test a student's capacity of designing by means of a four hours' paper because the scope of the subject was so wide and drawings so difficult that it was impossible to think out a design in the examination hall and put it on the paper. It was indeed a subject which required a lot of thinking and persistent and strenuous labour before a man could claim to be an average designer. The result of the four hours' papers was that the designs of the students, were obviously spoilt. The Board of Studies in Engineering therefore discussed a possible re-arrangement of the Examinations for the B.Sc. Part I and B.Sc. Part II in Mechanical and Electrical Engineering with a view to obtaining greater efficiency in the sessional work of the students especially in the production of complete working drawings and designs. The Board came to the conclusion that this could be met by replacing a few of the short four-hours' Examinations which involved the execution of drawings and designs, by drawings and designs executed by the candidates during the preceding session. These would be duly certified by the Professors, who would act as Internal Examiners, and would be placed at the time of the examination before a duly appointed Board of Examiners for inspection and valuation. The Faculty of Science had already accepted the above changes and he therefore hoped that the Senate would also accept them.

Professor R. S. Jain seconded the motion.

The motion was then put to the vote and carried.

5. Professor M. B. Rane moved:—

“That the recommendations of the Faculty of Science relating to the changes in the syllabus laid down for the Intermediate, B.Sc. and M.Sc. Examinations in Chemistry be accepted.”

In doing so he said that the Board of Studies made certain changes in the Syllabus of the Intermediate Examination. These were made in the light of the experience gained by them in the teaching of practical Chemistry. They found that the course of practical Chemistry did not give a complete idea of the whole arrangement which they wanted in that matter unless one or two things were added. These things were consequently added and the study of the elements thus introduced at the Intermediate stage would make the course very elaborate. The thing of fundamental importance with regard to this was the introduction of the Elementary principles of Organic Chemistry, which would be of great importance to the students at the B. Sc. stage and to those who would like to study Medicine, Agriculture or Botany. It was noted that very many students left their college after Intermediate so it was thought desirable to introduce Organic Chemistry so that they might have a chance of entering some business concerns.

With regard to the syllabus of the B. Sc. Examination, the portion relating to Industrial Chemistry had been deleted and identification of Acetic Acid, Formic Acid, Acetone, Ethyl Alcohol, Benzene, Nitrobenzene, Acetaldehyde, Aniline and Glycerine, had been substituted in its place. This change was necessary since they had now a full fledged course in Industrial Chemistry and therefore it was thought desirable that the portion relating to it in the Syllabus of Chemistry should be deleted.

As regards the M.Sc. Examination, the Board of Studies in Chemistry laid down in the Syllabus that a knowledge of

elementary Crystallography would also be required. This in the opinion of the speaker was very essential. The changes recommended by the Board of Studies were already accepted by the Faculty of Science. He therefore hoped that the Senate would accept his motion.

Dr. S. S. Bhatnagar seconded the motion.

The motion was put to the vote and carried.

The meeting was then adjourned to Tuesday, the 15th of April, 1924, at 5 P. M.

MINUTES OF THE ADJOURNED MEETING OF THE COUNCIL

No.

MONDAY-THE 14TH OF APRIL, 1924, 5 P. M.

PRESENT:

Pandit Madan Mohan Malaviya, Vice-Chancellor,
in the Chair

Principal A B Dhruva, Pro Vice-Chancellor.

Babu Gur Prasad Dwivedi,
Professor P. K. Telang,
Principal Charles A. King,
Professor P. K. Dutt,

Babu Jnanendra Nath Basu,
Pandit Iqbal Narain Gurtu,
Professor P. Seshadri,
Professor M. B. Rane, and

Professor Syama Charan De

1. Considered the report of the meeting of the committee appointed by the Council (under its Resolution No 6 of the 29th of March, 1924, to go into the whole question about the validity or otherwise of the claim of Messrs. Eric), held on the 14th of April, 1924

Resolved that a committee consisting of—

- (1) The Vice Chancellor,
- (2) Pandit Iqbal Narain Gurtu, and
- (3) Mr. Jnanendra Nath Basu

with Mr Jnanendra Nath Basu, as Convener, be appointed to settle the matter with the firm

2 Read letters Nos A 32/2098 & 99 dated the 7th of March, 1924, from the Executive Engineer, submitting estimates amounting to Rs 47/- and Rs 558/- for making a Bund for the Ayurvedic Garden and Tank for the Botanical garden, respectively -

Resolved that the estimates for Rs. 47/- & Rs. 558/- respectively be sanctioned for the purpose.

3. Read letter dated 8th of March, 1924, from Messrs. R. S. Batliboi & Co., Incorporated Accountants, submitting their terms for the audit of the University Accounts.

Resolved that half the audit fees cannot be paid in advance but in addition to the audit fees of Rs. 1,000/-, Rs. 5/- per diem as halting charges and one return second class fare from Calcutta be paid to the auditor.

4. Read letter from Professor R. S. Inamdar, requesting that a sum of Rs. 300/- be sanctioned for pots for growing cotton plants for an Experiment.

Resolved that a sum of Rs. 100/- be sanctioned for the purpose.

5. Read letter dated the 12th of March, 1924, from Professor R.S. Inamdar, requesting that as the department has exceeded the budget grant, the necessary expenditure on the Botanical Garden till the next budget be sanctioned.

Resolved that an additional sum of Rs. 1,000/- be sanctioned for the Botanical Garden for the current session. (Pandit Iqbal Narain Gurtu dissenting)

Resolved further that the Head of the Department of Botany be informed that the expenditure of the Department should on no account exceed the amount provided for in the Budget.

6 Read letter dated the 14th of March, 1924, from the Registrar, Benares Hindu University, forwarding a copy of the Resolution of the Jain Vidyadog Mandal, offering an endowment of Rs. 10, 000/- for scholarships on certain conditions.

Resolved that the endowment be accepted and the thanks of the Council be conveyed to the Donors.

Resolved further that the Pro-Vice-Chancellor be requested to correspond with the donor regarding the conditions of the award of the proposed scholarships.

7. Read letter dated the 10th of March, 1924, from Dr. H. R. Mehra, re the salary of the teachers appointed as a temporary measure to carry on the work of Professor S. C. Varma resigned.

Resolved that an acting allowance of Rs. 25/- per mensem be given to Mr. Ramchandra Saksena for the period for which he worked as Assistant Professor of Zoology, and that an allowance of Rs. 40/- per men-sem be given to Mr. S. C. Chatterji for acting as a Student-Demonstrator. (Pandit Iqbal Narain Gurtu dissenting on the first part of the resolution).

Resolved further that a committee consisting of the gentlemen named below be appointed to consider and report on the question of acting allowances which may be paid to the staff in the University.

- (1) Pandit Iqbal Narain Gurtu,
- (2) Professor P. Seshadri,
- (3) Babu Gur Prasad Dhawan, and
- (4) Mr. J. N. Basu (Convener).

8. Read letter No. 2000 dated the 13th of February, 1924, from the Registrar, Benares Hindu University, forwarding Resolution No 5 of the meeting of the Syndicate, held on the 6th of February, 1924 re-the conditions proposed by the Mysore University for the exchange of professors.

Resolved that the recommendation of the Syndicate be accepted and a copy of the resolution be sent to the Registrar, Benares Hindu University for necessary action.

9. Read letter dated the 18th of September, 1923, from Professor P. Seshadri, suggesting that the Council should lay down rules with regard to superannuation.

Resolved that a committee consisting of:—

- † (1) The Pro-Vice-Chancellor,
- (2) Mr. J. N. Basu, and
- (3) Professor P. Seshadri

with Professor P. Seshadri, as Convener, be appointed to go into the matter and report.

Resolved further that the Committee appointed by the Council under its Resolution No. 7 dated the 30th of July, 1918, be discharged.

10. Read letter dated the 16th of March, 1924, from the Registrar, Benares Hindu University, requesting that he should be supplied with a new Typewriter in place of the old one, for the use of his office.

Resolved that a sum not exceeding Rs. 400/- be provided in the Budget for a new typewriting machine.

11. Abstracts of Receipts & Expenditure of the University for the months of September, October, November and December 1923 and January 1924 were laid before the Council.

Resolved that the abstracts be filed.

12. Read letter from Professor P. Seshadri, requesting the Council to re-constitute the Finance Committee.

Resolved that the Finance Committee be reconstituted as follows:—

- (1) The Vice-Chancellor,
- (2) The Pro-Vice-Chancellor,
- (3) The Hon'ble Raja Moti Chand,
- (4) Sir Gangaram,
- (5) Rai Bahadur Pandit Baldev Ram Dave,
- (6) Professor Syama Charan De,

- (7) The Hon'ble Mr. Justice Kanhaiya Lal,
- (8) Pandit Iqbal Narain Gurtu.
- (9) Professor P. K. Telang,
- (10) Mr J. N. Basu, and
- (11) Mr. Gur Prasad Dhawan, (CONVENER.)

Resolved further that four will form the quorum for the meetings of the Committee.

13. The following persons were granted loans out of their Provident Fund Deposits as noted against their names to be recovered according to rules:—

- (1) Babu Ambika Prasad, Record Keeper,
University Office Rs. 130/-
- (2) Munshi Mahesh Prasad, Lecturer,
Persian and Urdu „ 120/-
- (3) Mr B. P. Mukerji,
Head Accountant, University Office. „ 300/-

14. *Resolved* that on the ground of economy in the collection expenses and of convenience both to the members of the staff and to the University Office, the rents due for University residences and rates for water & light be deducted from the salaries of the members of the staff and other employees of the University from month to month.

Resolved further that a copy of this resolution be sent to every member of the staff and other employees of the University concerned.

15. Read letter dated the 29th of March, 1924 from Messrs Khaitan & Co. Solicitors, Calcutta, re the case of Heatley & Gresham, Ltd, Versus Benares Hindu University.

Resolved that the Committee appointed by the Council (under its Resolution No 3 dated the 17th of March, 1923, to

take all necessary legal steps for the recovery of the amount of Rs. 65,000 advanced to Messrs. Heatly & Gresham, Ltd.) be authorised to deal with the matter as they may think fit.

The meeting was then adjourned to Tuesday, the 15th of April 1924, at 6 P. M.

1. Professor K. K. Mathur moved :-

That the recommendation of the Faculty of Science relating to the introduction of Geology as an optional subject at the Intermediate Examination in Science be accepted and that in Chapter XXVIII, Regulation 9 B., the following combinations be added :-

Chemistry, Biology and Geology,
Mathematics, Chemistry and Geology.

In doing so he said that he thought it necessary to explain as to why he moved his proposal. Three years ago, Geology was one of the subjects of study at the Intermediate

stage But it was subsequently abolished The main point urged in favour of abolition was that students became qualified to learn Geology only after they had acquired the rudiments of Physics and Chemistry When that proposal was brought forward before the Senate he had just joined the University But experience elsewhere had shown that Geology could be taught at the Intermediate stage

The speaker admitted that some elementary knowledge of Physics was necessary for the teaching of Geology but that did not mean that they could not provide for the difficulty Although unfortunately it was true that a certain number of students would come to join the Intermediate Class who never read Physics and Chemistry at the School and would take up Geology because the Senate up to that time had put no restriction with regard to that, yet he did not see any danger in the matter He had thoroughly considered that point and made provisions in the syllabus to meet the difficulty An elementary course in Physics had been recommended for the study of the students who wished to take up Geology and if no other arrangements could be made by the Physics Department, the Department of Geology would itself teach that subject

The Vice Chancellor interposing said —“I do not want that any Department should teach any other subject That is a bad policy If Physics is to be taught it must be taught by the Physics Department which I need hardly say is properly equipped for the purpose The Department of Geology is not expected to teach Physics in the same way as the Department of Physics can ”

Professor K K Mathur said that he had made the remark for the sake of argument but as the University Professor of Geology he would see that the teaching would not suffer in any way and that the best possible arrangement would be made for teaching Physics to the students

Proceeding further, he said that the arrangement proposed would give students the required knowledge of Physics. In his opinion the standard of Geology at the B. Sc. stage was not sufficiently high and could never be high unless they would begin to teach elementary Geology at the Intermediate stage. He was anxious that the standard of Geology at the University should be as high as in Botany, Zoology and other Sciences and that was the main cause which led him to bring forward the motion.

It was urged that an elementary knowledge of Physics and Chemistry should be imparted to every Science student. But he was neither a Physicist nor a Chemist and so he could not make any authoritative pronouncement in the matter. Personally speaking, he did not see any reason why the introduction of Geology should be delayed or the standard of the B. Sc. in general be impaired simply by accepting the hypothesis that students became qualified to learn Geology only after they had acquired some elementary knowledge of Physics and Chemistry. The proposal which he moved had been considered fully by the Board of Studies and the Faculty of Science. The Faculty of Science passed the resolution almost unanimously. When the matter was put to the vote in the Faculty, 14 voted for and one against the motion. He therefore moved his proposal as the recommendation of the Faculty of Science.

Dr. S. S. Bhatnagar seconded the motion.

Professor M. B. Rane said that in the Faculty of Science he had spoken against the proposition moved by Professor Mathur. But at that stage he would like to make his point clear. There were two opinions with regard to the proposal. The one was that Geology could not be taught to the students at the Intermediate stage without their first obtaining a knowledge of Physics and Chemistry, while the other was

that it could be taught without first acquiring a knowledge of those two subjects.

Personally speaking, he was not convinced by the arguments put forward by Professor Mathur in support of his proposal. He still maintained that it would always be advantageous for a student to acquire some knowledge of Physics and Chemistry before he took up the study of Geology. Besides, there was no difficulty in obtaining students for the Intermediate Class, who had already studied those two subjects at the School. They had a High School where 50 percent of the students read Physics and Chemistry and those were quite fit persons in his opinion to study Geology if they wanted to do so. But under the existing circumstances they could not take it up since Geology was not taught at the Intermediate stage. Therefore he for one could not see any reason why those students should be debarred from taking up Geology.

Then there were the remaining 50 per cent of students at the School who studied the pure Arts Course. It was possible that some of these would like to read Geology for the Intermediate Examination. But he was of opinion that it was undesirable to allow them to do so. The difficulty could be got over by making a restriction to that effect for the College courses. In order to remove such undesirability he had brought-forward a motion sometime ago before the Faculty of Science but it was not accepted. In his opinion it was desirable that some such restriction should be laid down by the Senate and if they did so, he did not see any reason why Geology should not be introduced at the Intermediate stage.

Professor L. D. Coeslant in supporting the motion said that theirs was not an ordinary College but a University where all sorts of subjects should be taught. The wider, the choice

of subjects the better it would be for the students. So far as that particular case was concerned he understood from the speech of Professor Mathur that instruction in an elementary knowledge of Physics would be imparted to the students. But in his opinion only the Physics Department should teach it. If they did so he did not see any reason why Geology should not be introduced at the Intermediate stage.

Professor N. P. Gandhi in opposing the motion said that he was not at all in favour of the proposition put forward before the Senate by Professor Mathur. He was aware that throughout the world Physics and Chemistry were first taught to students before they were allowed to take up Geology. He urged very strongly that those students who had learnt Physics and Chemistry beforehand were the fit and proper persons to take up Geology. He considered the students who had passed their Inter-Science with Physics, Chemistry and Biology as the best qualified to learn Geology and those with Physics, Chemistry and Mathematics as the next best.

Secondly, if they accepted the proposition with the groupings as they were they would be excluding Physics, which was the most important subject for Science students. It was the most useful subject for the B.Sc as well as for the M.Sc. students. Besides, without a knowledge of Physics, a student could not take up Chemistry and the consequence would be disastrous. He always considered it necessary for a student who took the B.Sc or the M.Sc. Degree to have at least an elementary knowledge of Physics and Chemistry. It was desirable in his opinion to make a study of these two subjects compulsory at the Intermediate stage. Their courses were so framed that they would lead their students to various professional lines. For instance, a student after passing the Intermediate Examination could study Geology, Engineering, Medicine, Forestry, etc., But

the groups which had been recommended in the proposition of Professor Mathur would lead them nowhere

Dr. S. S. Bhatnagar said that he had already seconded the motion but at that stage he would like to express his opinion in a few words. Professor Gandhi had mentioned that the groups recommended in the proposal in question would lead students to nowhere but that was not so. The groups had got their own utility. A student after passing his Inter-Science examination under these groups could study Geology, Botany, Sanitary Science etc. He could join the Educational line after passing his M. Sc. Examination. Professor Gandhi had made a reference to the Universities which taught Physics and Chemistry at the Intermediate stage and Geology at the B. Sc. But the speaker would tell the Senate that there also existed such Universities as taught Geology side by side with Chemistry and Physics. Besides, Professor Gandhi had not taken into consideration the 50 per cent of the students who passed the Admission Examination with Physics and Chemistry as had been mentioned by Professor Rane and these students had thereby acquired some rudiments of Physics and Chemistry as was desired by Professor Gandhi. The difficulty pointed out by Professor Gandhi if it were at all a difficulty could be met easily. They could teach Physics and Chemistry side by side with Geology or admit only those Matriculates who had studied Science courses. Sometime ago, a proposition was brought forward before the Faculty of Science to the effect that only those students who had taken Science at the Admission Examination should be allowed to take the Science courses at the University but unfortunately that proposal was defeated. If the Senate recognised the need of such a provision they could lay it down then and there. But he maintained that there was no safeguard needed since he found from the speech of Professor Mathur that the necessary

instruction in Physics would be imparted to students side by side with Geology at the Intermediate stage.

Proceeding further, Dr. Bhatnagar said that there was a tendency at present in the educational world which made it imperative upon a Modern University to provide for the teaching of as many subjects as possible at the Intermediate stage. The London University taught Geology at the Intermediate stage. The Cambridge University introduced it even at the School stage. In the Local Senior Cambridge Examination, the standard of which was equivalent to that of the Matriculation of the Allahabad University, Geology was introduced as one of the subjects of study. The Punjab University was teaching Geology in the Intermediate classes. It was therefore desirable that Geology should be taught at the Intermediate stage at their University which was not a provincial University but an All-India University where students from all parts of the country came to seek admission.

Professor R. S. Inamdar was of opinion that Geology could be taught at the Intermediate stage without a knowledge of Physics and Chemistry. He himself learnt Geology without having learnt anything of Science. But he admitted that the objection raised by Professor Gandhi might be right in the case of the advanced study of Geology which they required at the B Sc stage. At the Intermediate stage they were at present teaching Physics and Chemistry and if a student wanted to specialise in Geology why should he not be allowed to begin it two years earlier at the Intermediate stage.

Proceeding further, Professor Inamdar pointed out certain difficulties in the combination of subjects which a student was recommended to take. He said it was very difficult to frame groups which would be most suitable for the students who took Geology along with other subjects at the Intermediate stage. Two groups were recommended and if a student selected

any one of those groups he would have to study a special course in Physics recommended for the purpose. In his opinion the difficulty could be got over by adding one more subject for the Intermediate Examination. Further, students who wanted to take Geology at present at the B. Sc. stage were required to take Physics and Chemistry at the Intermediate stage, but if they did not change that regulation, the students who took up Chemistry, Biology and Geology or Mathematics, Chemistry and Geology would not be allowed to take up Geology. Besides, they should also think of providing a compromise with regard to those students who would study Geology at the Intermediate stage but would not confine their attention to it at the B. Sc. stage. All those points should be considered before they arrived at a definite conclusion.

Professor P. K. Telang said that he understood from the speech of Professor Mathur that there would be two courses in Physics at the Intermediate stage. The one would be the ordinary course and the other the special course for those who would take up Geology. He was therefore at a loss to understand how they would be able to provide for instruction in those courses. Under the circumstances of the case it seemed to him that they were putting themselves in great difficulties.

Principal Charles A. King said that he had no objection to Geology being introduced at the Intermediate stage. It would make the choice of subjects wide. But he was emphatically of opinion that every student who joined the Intermediate Science classes must take besides Geology or any other subject, Physics, Chemistry and Mathematics because those subjects were very important and would be of the greatest usefulness to him.

The Vice-Chancellor after listening to the whole debate observed that the question before them was a very important

one Geology was a subject which had its own utility. But the question was whether it should be introduced at the Intermediate stage.

First of all, they should consider whether they wanted that the students should only acquire the rudiments of the subject or they wanted to prepare them for new careers in life such as those of Geologists, Prospectors, etc. If they wanted to provide new careers they should make up their mind and frame the courses from that point of view. If a student wanted to become a Geologist he should require a certain amount of knowledge of Physics although a high degree of knowledge was necessary for a Physicist. They should therefore consider what would be the combinations of subjects which would be most suitable. Then they would have to consider whether the knowledge of Physics and Chemistry imparted at the Admission stage would suffice for the purpose. If so, whether it would be advisable to make a restriction to the effect that only those students who took up Physics and Chemistry at the Admission Examination should be allowed to be admitted to the Intermediate Science course, or Physics and Chemistry could be taught side by side with Geology. If they decided that in introducing Geology at the Intermediate stage their object should be to train good geologists; they must then frame their courses from that point of view.

The Vice-Chancellor further observed that it had been urged in the course of discussion, that it was possible that a student might leave Geology at the B.Sc. stage. But in the opinion of the Vice-Chancellor, it was not likely that a student who had taken Chemistry, Biology and Geology or Mathematics, Chemistry and Geology would give up Geology at the B.Sc. stage for some new subject. Similarly, a student who had not studied Geology at the Intermediate stage would not very likely take it up at the B.Sc. stage. However, if they thought that a student should be given a choice of specialisation

in a subject at the B Sc stage then certain subjects should be compulsory at the Intermediate stage and at the B Sc stage the student should be left free to select one of them for specialisation. They should further consider whether the subject to be taken up for specialisation should be one of those which a student had studied at the Intermediate stage or any new subject. Principal King and others had urged that a fourth subject should be added at the Intermediate stage. This was also a point for consideration.

Professor M B Rane pointed out that the Faculty of Science had already such a proposition before it for consideration.

Continuing, the Vice Chancellor said that all the points he had mentioned should be fully considered before they arrived at a decision. He was therefore of opinion that the matter should be sent back to the Faculty of Science for reconsideration.

The following proposition was then put to the vote and carried —

"Resolved that the Faculty of Science be requested to reconsider the question of introducing Geology at the Intermediate stage along with the other proposition namely that of introducing a fourth additional subject for the same examination which the Senate is informed is already before the Faculty."

2 Professor R S Inamdar moved —

That the following recommendation of the Faculty of Science be accepted .

"That the Faculty recommends that a Bachelor of Agriculture of Indian Universities established by an Act of Legislature be eligible for admission to the M. Sc Course of the Benares Hindu University."

In doing so he said that the present regulation with regard to the admission of students to the M Sc courses did not allow a B.Ag. of the Bombay University or of any other University established by an Act of Legislature to be admitted to the M. Sc Courses Sometime ago, the matter came before the Senate but it was sent back to the Faculty of Science for reconsideration The Faculty at its meeting held on the 17th of March, 1924, had recommended that a B Ag of Indian Universities established by an Act of Legislature should be eligible for admission to the M Sc Courses of the Benares Hindu University

He was anxious that a Bachelor of Agriculture should be admitted to the M Sc Courses in Botany because for the last three years he had been receiving applications from graduates in Agriculture soliciting permission to prosecute their studies in Botany at the M Sc stage at their University but every time he had to give them a reply in the negative. Some of these were very brilliant students and any University should like to have them But his difficulty was that the present regulation did not allow him to do so.

A point was urged on the previous occasion that the University of Bombay did not admit these graduates to its M Sc Courses But the reason was that the Bombay University had got the M Ag Course and the students who wanted to study further could join that course But the conditions at their University were quite different They had not got a College of Agriculture But a B Ag. could very well be admitted to the M Sc. Courses in Botany and Chemistry He hoped that the proposition would commend itself to the Senate

Dr. S. S. Bhatnagar seconded the motion.

Professor M. B. Rane in opposing the motion said that so far as Chemistry was concerned he was not prepared to consider the proposition at that meeting.

Professor P. Seshadri strongly opposed the motion. He said that the Agricultural College at Poona was under the University of Bombay. But he knew that it had not recognised the B. Ag. as a qualification for admission at its M.Sc. Course. Besides, there was no other University in India where the B. Ag. Degree was considered as a sufficient qualification for admission at the M.Sc. Courses. He believed that Professor Inamdar would have no difficulty in finding students for the M. Sc. Courses in Botany and there was no cause of anxiety with regard to this. But as the Bombay University did not recognise the B. Ag. which in his opinion ought to be more friendly to the Poona College than the Benares Hindu University could be expected to be, he could not help opposing the motion.

Dr. S. S. Bhatnagar said that the B.Sc. of a University could be admitted to the M.Sc. course in any subject. But a man who took up Physics and Chemistry and Mathematics at the B. Sc. Examination would naturally take any one of these subjects at the M. Sc. and would not be so foolish as to take up subjects which he never studied before. Similarly, *a man who studied Agriculture would naturally take up Botany and Chemistry*. In case, the applicant was not competent to be allowed to take up Chemistry, the Syndicate had got the right not to admit such a student.

Professor R. S. Inamdar said that he wanted to explain two points at that stage. The first point that was urged was that the Bombay University had not recognised the B. Ag. Degree of the Agricultural College, Poona. But this point the speaker said he had already made clear. The Bombay University had got the M.Ag. Course and therefore students could join it after obtaining their B. Ag. Degree. Secondly, it was mentioned that no other University had recognised that Degree for admitting students to the M.Sc. Courses. But

he did not agree with the opinion that unless the sister Universities recognised a Degree, they should not do so

" Professor Inamdar then described his own case. He said that after obtaining the B. Ag. Degree of the University of Bombay he wanted to join the University of Cambridge but on reaching there he found 'that the Degree which he had obtained was not recognised by that University and the result was that he had to undergo there Admission Examination which in his opinion was even inferior to the Admission Examination of the Benares Hindu University. He then moved 'the authorities in the matter and the result was that the Bombay University got the B. Ag. Degree, recognised by the Cambridge University. Similarly, if the Degree of any University was not recognised by any other University, it was the duty both of the graduates of that University and also of that University itself to take steps to get its degree recognised by the other University. The admission of a student to a certain course should depend upon his merits. Some students after obtaining their B. Ag. would enter life, while others wanted 'to do some research work. And if such students wanted to come to him for guidance and research and for further study he did not see any reason why the University should not allow them facilities in that direction.

The Vice-Chancellor : "Have you compared the courses for the B. Ag. degree of the University of Bombay with those of ours at the B. Sc stage ? Will such students be able to follow the courses in Botany and Chemistry at the M. Sc stage ?"

Professor R. S. Inamdar said that for the Degree of the Bachelor of Agriculture, the Bombay University had got a 4 years' course. The first two years were devoted to the Intermediate course and the next two years to the Degree course. In the Intermediate Class there were 4 subjects—

Agriculture, Geology, Botany, Mathematics and Elementary Physics. In that class the courses in Botany were not so advanced as those in the B. Ag. Class. At that stage they taught general principles and then for the B. Ag. degree, the courses were much advanced. Besides, the students had to undergo a practical test. In these courses there were certain subjects on which more stress was given because there was a need for it. While at the Benares Hindu University, the courses had been prescribed from a different point of view. Similarly, in Chemistry they taught both Organic and Inorganic Chemistry. There were 4 papers in Chemistry at the Intermediate stage which covered Inorganic Chemistry, Organic Chemistry, General and Theoretical Chemistry, including the History of Chemistry and Mineral and Metallurgical Chemistry or higher Physical or Biological Chemistry and chemistry of food. Besides, the Practical Examination was to occupy at least four days. Then at the B. Ag. stage, the courses in Chemistry were much higher. A student at the B. Ag. was examined in 5 subjects. Professor Inamdar then read the syllabus of the whole B. Ag. course at the B. Ag. stage and submitted that the knowledge which a student would gain by obtaining his B. Ag. Degree would be sufficient to enable him to follow lectures as that of a B. Sc. of their University.

The motion was then put to the vote and carried.

(b) *Resolved* further that consequential changes be made in the Regulation, relating to the Degree of Master of Science so as to enable a B. Ag. of Indian Universities established by an Act of the Legislature to be admitted to the M. Sc. Courses of the Benares Hindu University.

3. Professor Syama Charan De moved :—

That the following recommendation of the meeting of the Faculty of Law held on the 26th of March, 1924, be accepted :—

“That the Faculty recommends to the Senate that Resolution No 1 of the meeting of the Senate held on the 7th of August 1923 be re considered and that Regulation 15 of Chapter XXXV be deleted

Pandit Indra Deva Tewari seconded the motion

After some discussion the mover withdrew his proposal by leave

4 Considered the question of prescribing subjects for Narsingh Prasad Hari Prasad Buch Metaphysics Prize Essays and the Swami Madhusudanand Saraswati Shankar Vedant Prize Essays for the year 1924 1925

Resolved that the following subjects be fixed for the essays —

For Narsingh Prasad Hari Prasad Buch Metaphysics

1. Read letter dated the 9th of April, 1924, from Maulvi Fazl Munshi Mahesh Prasad applying for a suitable grade, designation and increment of salary.

Resolved that Munshi Mahesh Prasad be designated Lecturer in Persian and Urdu.

Resolved further that the following gentlemen be designated as follows —

| | |
|--------------------------|------------------------------|
| Mirza Mohammad Hasan | Lecturer in Persian and Urdu |
| Pandit Ramchandra Shukla | Lecturer in Hindi |
| Lala Bhagwan Din, | Lecturer in Hindi |
| Pandit Harihar Sastri, | Lecturer in Bengali. |

2. Read letter dated the 5th of March, 1924 from Professor P. B. Adhikari to the Principal Arts College, recommending that Mr. Brahmajal Aranya M. A., Assistant Professor of Philosophy be confirmed in his post.

Resolved that Mr. Bhikhanlal Atreya be confirmed in his post with effect from the 1st of May, 1924, and that he should draw his increment from the 6th of August, 1924.

3. Read letter dated the 29th of February, 1924 from the Principal, Engineering College recommending that Mr. H. L. Chhibber, Demonstrator in Geology be made permanent in the grade of Rs. 150-15-300, from July 1924 and that he be allowed to start on the permanent roll with a salary of Rs. 165/- per mensem from that date.

Resolved that Mr. Chhibber be confirmed in his present post on his present salary and that he be informed that the question of his status, grade and salary will be considered along with the Budget for 1924-25.

4. Read letter No. 2404/VI-H-8 dated the 11th of April 1924, from the Principal, Engineering College recommending that Mr. B. N. Tiwary extra Assistant workshop clerk be confirmed in his post.

Resolved that Mr. B. N. Tiwary be confirmed in his post on his present salary with effect from the date on which his probationary period expired.

5. Read recommendation of Professor M. B. Rane, to the effect that Mr. Krishna Chandra Banerji, Demonstrator be confirmed in his post.

Resolved that Mr. Krishna Chandra Banerji be confirmed in his post on his present salary with effect from the date on which his probationary period expired.

6. Read application from Babu Braj Jivan Das, Cashier, University office submitting that as he has furnished the security of Rs. 5000 he may be confirmed and put in the grade of Rs. 50.5-100 with effect from the date on which the probationary period expired and the recommendation of the Assistant Secretary of the Council there.

direct, without reference to the Pro-Vice-Chancellor but they must pay for them out of their respective imprest allotments.

11. Read letter No. 2038/VI-H-23 dated the 22nd of February, 1924, from the Principal, Engineering College intimating that he had given increments to certain employees of the workshops as mentioned in his letter.

Resolved that the increments given by Principal King be sanctioned.

| (b) 1. Raw materials such as coal, clay, & felspar etc... .. | 3,000/- p.a. |
| 2. Chemicals etc. | 1,800/- p.a. |

Total .. 4,800/- p a.

Say, Grand total .." 7,500/- p a

The plant as designed above would be capable of annual
out turn of approximately 300 mds of ware, such as cruci-
bles, basins, and other laboratory requirements for the use of

the College. The price may be reckoned at Rs. 30/- per Md. or a possible income of Rs. 8,000/- after deducting 20% breakage and waste etc., in the course of manufacturing, handling and packing, an amount which might cover the annual expenditure to be incurred in this branch of the industrial department, but shows no profit excepting that the teaching of classes will be considered as profit.

(2) As soon as the work will be started in this branch, it is hoped, nay it is certain, that it will be able to manufacture different kinds of models which are necessary and will be required for the Medical College of the University and thus a few thousands of the University will be saved.

White and coloured chalks of different qualities which are already used in the colleges as well as in schools will also be prepared for the supply of the colleges of that University and surplus quantity will be sold at the very near market.

(3) There are so many side lines of the University such as preparation, China clay, French chalk, Plaster of Paris, red and yellow Ochres, which can easily be manufactured in this branch of the department and can be sold at a profit to different textile, paper and paint manufacturers provided that the fabrication of these can be started on fairly commercial lines and basis.

Machinery and its fittings.

A. The list of the machines already fitted up in the industrial department.

- (1). Dust pug mill.
- (2). Ball mill for disintegrating hard materials up to grain size.
- (3). Pulverising ball mill (stone ware).

- (4). Blunger for blunging clay or other plastic materials.
- (5). Wet crusher which can be used for mixing the body materials in dry state.
- (6). Colour grinding pan.
- (7). There are different types of presses, which after small alteration and additions can easily be used for both the purposes they have already been fitted up and for ceramic purposes.

B. A list of machines which will be prepared and purchased locally and abroad.

- (1). Two chert runner for grinding felspar of quartz (will be made locally as I have got designs and blue prints).
- (2). One jolly for making small muffins (abroad).
- (3). One Jigger „ „ „ „ (abroad).
wooden
- (4). (One small filter press) (locally),
- (5). One potter's wheel (abroad).
- (6). One lathe for turning the articles in leather hard condition.
- (7). Four small stone pans for colour grinding (locally).
- (8). One press for electric goods (abroad).
- (9). One magnetising machine (abroad).

1.

BUILDING.

- (1). The necessary room for manufacturing shops etc, is quite sufficient in the industrial department.
- (2). One temporary shed for drying purposes as well as for the erection of kilns etc., will be erected outside at a convenient place, the symmetry of the present building will not be spoiled

SD DOGAR SINGH.

- (3). One biscuit and glaze kiln will be erected for which I have got the design and blue print.
- (4). One muffle kiln will be erected for decorating purposes.
- (5). One small kiln for calcining felspar, limestone & quartz etc.

D. Tools and appliances for kilns.

- (1). One baiting poker about 6 ft. long 1 inch thick made of best steel.
- (2). One punching poker 6 ft. long $1\frac{1}{2}$ inch thick made of best steel.
- (3). One drawing rod for drawing out the trials.
- (4). One heavy rake for pulling out clinkers.
- (5). 2 hand-barrows.
- (6). 6 buckets.
- (7). 8 shovels.
- (8). One ladder of suitable length for drawing out trials and having a ledge on the top

E. Printers sundries.

- (1). Flannel rubbers
- (2). Printer's size cane.
- (3). Iron colour slab 17 inches diameter.
- (4). Corduroy boxes
- (5). Wooden dabbers.
- (6). Roller for litho-printers.
- (7). 3 rubber rollers for colour printers.
- (8). Complete slip lining out-fit.
- (9). Containing two rubber bulbs with glass tubes and glass fillers.
- (10). Buller's firing trial guage with dozen rings.
- (11). Modeller's tools complete set from No. 1 to 26.
- (12). Mould makers tools from No. 32 to 34.
- (13). Potter's tools from No. 34 to 47.

RAW MATERIALS.

China clay, white burning clay, plastic clay, buff and red clays, felspar, quartz, quartzite, pegmatite, limestone, dolomite, flourspar, gypsum, etc., etc., are available in very large quantities in localities not far from Benares and in direct connection by rail. This is a matter of greatest importance bearing as it does on the initial cost of materials and justifying the choice of introducing this branch in the industrial department of the University.

THE SPECIAL CONVOCATION.

29TH OF JANUARY, 1924

The Special Convocation of the Benares Hindu University was held on the 29th of January, 1924, at 3 p m in a Shamiyana at the Arts College Quadrangle and was presided over by the Chancellor, His Highness the Maharaja Gaekwad of Baroda. The function was attended by His Highness the Maharaja Sahib and the Maharaj Kumar of Benares and a large number of distinguished ladies and gentlemen.

When the Chancellor, the Vice Chancellor, the Pro-Vice Chancellor and the members of the Senate had taken their seats on the *dais*, the Vice Chancellor observed that the Special Convocation of the Benares Hindu University had been called to confer the Honorary Degrees of Doctors of Laws on His Highness the Maharaja Gaekwad of Baroda and His Highness the Maharaja Sahib of Benares and requested His Highness the Chancellor to declare the Convocation open.

His Highness the Chancellor then declared the Convocation open.

The Pro-Vice-Chancellor presented His Highness the Maharaja Gaekwad of Baroda to the Vice Chancellor and said

"Sir, I have the honour to present unto you, His Highness Maharaja Sir Sayaji Rao Gaekwad III of Baroda on whom the Senate of the University has, unanimously recommended that the Honorary Degree of Doctor of Laws of the University be conferred and who by reason of his high attainments and position is eminently a fit and proper

person to be honoured by the University by the conferment of such a degree, which I pray may be conferred upon him."

The Vice-Chancellor said: "The Senate of the Benares Hindu University has unanimously recommended that the honorary degree of Doctor of Laws should be conferred upon your Highness. They thought that there is no other prince in India who more pre-eminently deserves to be honoured by the conferment of such a degree than your Highness. Even since your Highness came to sit on the Gaddi in 1881, you extended your patronage to the cause of education in a very earnest manner. Soon after your accession you took steps to give practical effect to your ideal, so highly cherished by you in your early boyhood by issuing the memorable proclamation of 1885 in which your Highness ordered the opening of thirty new Schools every year. Herein was the seed of an education system sown which has now grown so luxuriantly with branches flourishing in every direction.

This scheme of the expansion of education by the opening of 30 new schools every year continued on till 1892-93. But not satisfied with the progress which was then achieved, your Highness was pleased to decide upon the promulgation of a Compulsory & Free Educational System and as an experimental measure sanctioned in 1892-93 the application of it to 10 selected villages of your Raj.

The experiment having yielded satisfactory results, your Highness sanctioned the introduction of Compulsory Free Education in the whole State and the Scheme was fully promulgated under the Compulsory Education Act of 1906-07. A census of children of school-going age was immediately started, and an expansion of education on a large scale was undertaken with the result that at present every one of the 3300 villages, which has at least 30 children of school going

age has come to own a School. This Policy of your Highness, splendid as it was not only gave benefit to those who had the fortune of living in your enlightened State but is a matter of great encouragement to those who live outside it.

As the expansion of education went on rapidly, the need for trained teachers was felt keenly. Hence your Highness opened Training Colleges for men in your State. These not only supplied the existing Schools in the State with trained teachers but provided new careers for those who wanted to take up teaching as profession.

Your Highness has also been a staunch friend of female education. It is noteworthy that a sound scheme of female education was duly laid along with that for boys. A Training College for women has been opened, which provides training for about 150 women teachers for whom a commodious and well-equipped hostel has also been provided. To popularise the teachers' profession among Indian women, attractive scholarships, and suitable concessions in the matter of rendering service have been granted by the State. Training classes for women have also been opened at Patan and Amreli in order to meet local difficulties of women.

Zanana classes have been started in important District towns with a view to encouraging literacy among house-wives and Pardah-women where along with ordinary literary education, provision has also been made for teaching domestic science. These classes have proved very useful in case of those girls who after attaining a certain age are cut off from receiving education in public schools.

The teaching of domestic science and household art, which is in fact the most important aspect of female education, has not been neglected. The Training College for women as well as the Maharani High School for Girls provide for a

fairly complete course in Domestic Science subjects such as cookery, sewing, knitting, drawing, music etc. A very large number of Girls' Schools has been since the inception of the compulsory free education measure provided with a modest course in sewing and knitting, and most of the town girl schools have provision for a fairly fuller course in domestic science and music. It is therefore a pleasure to note that no girl educated in Baroda will be deprived of *Sangita* which is a cultural training for men as well as for women. Besides, musical education has also received an equal measure of attention from your Highness.

As a well-known practical worker in the field of social reform, Your Highness' effort in the educational up-lift of the backward and especially of the depressed classes are note-worthy. Your Highness, endeavours to up-lift the depressed classes of your State, such as Antyajas and Garoda communities stand unique. It is a matter in which we all feel very grateful to your Highness. Your Highness' achievements in the *field* of education are well-known throughout the length and breadth of India.

Although the pioneer of a universal Compulsory and Free Education system in India, your Highness did not restrict your educational policy to the spread of literacy. You recognised the need of imparting technical education to the youth of this country and started a Technical institute known as "Kala Bhawan". It provides instruction in Mechanical and Civil Engineering, Chemistry, Dyeing, Textiles, Smithy, Carpentry, Commerce etc and from its very inception it has continued to attract a large number of students from all parts of India and has during its existence of over 33 years, sent out hundreds of youth, well-equipped, capable of earning an honest independent living. Besides this institute which is not only known in Baroda but throughout the length and

breadth of India, there are also two other technical Schools in the State—one at Navasari and the other at Amreli.

Your Highness has also formulated and launched a system of free Public Libraries in the State. Along with the creation of the Central Library; town Libraries in Important District towns were organised, which, gradually followed by the creation of village Libraries, so that within the last decade a net-work of over 700 libraries and about 100 Reading Rooms have spread all over the State, the benefits of which are availed of annually by nearly two hundred thousand people. The institution of Travelling Libraries is another novel feature of this movement, which annually circulates about 300 books from village to village. The Library organisation also conducts what is called Visual Instruction by giving numerous cinema shows of educational value. The whole Library system stands unique - It provides a source of inspiration among the subjects of State for learning. Not only those who read in Schools and Colleges derive benefit from these libraries but those outside them are equally benefitted.

Your Highness has also given a great encouragement to literature. Translation and original works in Marathi, Gujrati and Hindi are being published every year. With a view to encouraging Ancient learning, Your Highness has founded the "Gaekwad Oriental Series" in which Ancient manuscripts are edited and published. It is a matter on which lovers of Ancient learning and traditions feel deeply grateful to your Highness.

Taking into consideration, all these things one can say without a moment's hesitation that Your Highness is a great friend of education and an earnest patron of learning. The University cannot express its appreciation of your Highness' achievements in a better way than by conferring the highest

degree which it is in its power to confer upon such a gentleman.

It is also a matter of gratification to us, if I may say so, that the University within the first few years of its existence is honouring itself by honouring one who is both a prince and a patriot."

The Vice-Chancellor while delivering the diploma, said :

"By virtue of the authority vested in me as the Vice Chancellor of the Benares Hindu University, I confer upon your Highness, the Honorary Degree of Doctor of Laws of this University and in token thereof I present this diploma and authorise you to wear the hood ordained as the insignia of your Degree."

His Highness in replying said .

Mr, Vice-Chancellor, Your Highness, Ladies & Gentlemen.

"It was a great disappointment to me not to be able to be present amongst you on the last occasion. It was not a matter of caprice or mere whim but it was beyond my control to come here. The condition of my health was such that I could not be easily present here at that time. Therefore I assure you that my absence was not due to any whim or caprice.

"The Vice-Chancellor has referred to me in the most eulogistic terms. Whether I am entitled to the honour he has conferred upon me or not but since men of learning met and decided and since men holding such high ranks in the University life determined to honour me, there is no alternative for me but to accept it, however humble, I may feel of myself.

"Gentlemen, he has referred to my educational achievements. These are indications of my endeavours in which I

I think a State and a country *can go* and I tell you that when attempting these things in Baroda I like to see them far ahead and far abroad (Loud cheers) Our fates are so entwined and our connections so laid that it is not possible to connect ourselves without having these things Therefore, in the progress of the different parts of the country what affects one will sooner or later affect the others So, we are all interested in the general progress of our race and of our country

"Gentlemen, except these few words I do not wish to say anything more nor do I wish to detain you any longer in this Convocation as there is another function to be attended to. The last word that I have to say is that I am thankful to the University for the honour they have done me by conferring upon me the Degree which I feel I poorly deserve" The Vice Chancellor then presented His Highness the Maharaja of Benares to His Highness the Chancellor and said

"Your Highness, I have the honour to present unto you, His Highness Maharaja Sir Prabhu Narain Singh of Benares on whom the Senate of the University unanimously recommended that the Honorary Degree of Doctor of Laws of the University be conferred and who by reason of his high attainments and position is eminently a fit and proper person to be honoured by the University by the conferment of such a degree, which I pray may be conferred upon him "

He observed that the University owed a deep debt of gratitude to His Highness for all the encouragement and help which he had given to the Hindu University Even since the establishment of the Central Hindu College and ever since the project of establishing the University was put before the public His Highness was good enough to help and encourage them Besides His Highness' love for Sanskrit

Literature was very great and he had given much encouragement to promote the cause of Sanskrit learning. The Senate had therefore unanimously recommended that the Honorary Degree of Doctor of Laws should be conferred upon His Highness, the Maharaja Sahib of Benares.

While delivering the diploma, His Highness the Chancellor said :

"By virtue of the authority vested in me as the Chancellor of the Benares Hindu University, I confer upon you, Your Highness Maharaja Sir Prabhu Narain Singh Bahadur, G. C. S. I., G. C. I. E., of Benares, the Honorary Degree of Doctor of Laws of this University and in token thereof I present this diploma and authorise you to wear the hood ordained as the insignia of your Degree."

The Chancellor then said :

"Before we part may I take this opportunity to congratulate His Highness the Maharaja Sahib of Benares on the deserved honour that has been given to him by this University. May His Highness live long and give you encouragement and hopes in your future progress and achievements. I know that His Highness has taken a deep interest in this institution and I hope he will continue to bestow his fostering care on this young and juvenile institution until it can stand on its own legs in time to come."

His Highness the Chancellor, the Vice-Chancellor, the Pro-Vice-Chancellor and the Members of the Senate then rose and His Highness the Chancellor said :

"I now dissolve this Convocation"
